NRF Connect: Recommendation for application to the NRF

NRF Connect: NRF Awards Details of Nomination

Inbox

NRF Connect <nrfconnect@nrf.ac.za>

Fri, Apr 11, 11:56 AM (4 days ago)

to me

Dear Mrtshingombe tshingombe

You have been nominated for the 2023 NRF Awards,

Category of nomination:Research Excellence Award for Early Career/Emerging Researchers by Mrtshingombe tshingombe for application with reference number NONF250411310281 Kindly follow the link (https://nrfconnect.nrf.ac.za) to login to NRF Connect; once you have logged into the system, click on the Acceptance of Nomination menu item under the My Applications heading to accept the nomination.

Regards
NRF Awards Call

...

NRF Connect <nrfconnect@nrf.ac.za>

Fri, Apr 11, 11:07 AM (4 days ago)

to me

Dear tshingombe

tshingombe tshingombe has identified you to provide input for an application to the NRF. In order for the NRF to continue with the evaluation of the application, we would be most grateful if you could submit the required input for the applicant in the form of an on-line response.
Applicant: Mr tshingombe tshingombe
Email Address: tshingombefiston@gmail.com
Reference: NFSG250411310256
Institution: South African Qualifications Authority (SAQA)
Call: Black Academics Advancement Programme Post PhD Track
You have to be registered on the NRF Connect system in order to access the report form.

To register or login on the NRF Connect system, please go to https://nrfconnect.nrf.ac.za/?applicationSupportInvitation=CfDJ8Bu2J9Atv4hMpRZaXUWIRoWP9vQLSyinkEY6AWqpuZZrHoIVr8SlH9i6IuaofoAkaTFwXej1dEOW32hknDTUcgtAd9UIi4l4zvsxCRsrDJBHn1hLID-HRs2GUk7FxjM3hg
Should the email address, used for this notification, differ from your ORCID-linked email address, please ask the applicant to change your e-mail address on the application to your ORCID-linked e-mail address. This will ensure that the reporting templates are linked to your profile. Alternatively, they may contact Supportdesk@nrf.ac.za for assistance. Refer to applicant's details above.
Once you have registered or logged in, click on "Feedback on Submission" under "Reports" on the left-hand menu.

Alternatively, please copy and paste the following URL into a web browser to complete the report:
https://nrfconnect.nrf.ac.za/?applicationSupportInvitation=CfDJ8Bu2J9Atv4hMpRZaXUWIRoWP9vQLSyinkEY6AWqpuZZrHoIVr8SlH9i6IuaofoAkaTFwXej1dEOW32hknDTUcgtAd9Uli4l4zvsxCRsrDJBHn1hLID-HRs2GUk7FxjM3hg
The report must be submitted before the deadline of 2025-04-24.
We thank you in anticipation for your assistance in this important matter.
Regards
National Research Foundation

Please do not reply to this message. Replies to this message are routed to an unmonitored mailbox.

If you have questions contact the Support Desk (Mondays to Fridays from 08h00 to 16h30) on:

If you did not intend to register on the CSD and would like to **unsubscribe** to CSD system generated emails, click on **unsubscribe** which will enable you to dis-associate yourself from a supplier or Organ of State or to delete a supplier master from the CSD.

Welcome, Tshingombe Fiston

Welcome to the Central Supplier Database for the South African government. Here you can maintain your supplier information to ensure accurate, up-to-date, and complete

The menu bar gives you access to various functions like links to other websites, reports, and help. The tiles below give you access to the most frequently used features of the system. A brief description of each tile:

- Click on Suppliers Details to add, view, or make changes to supplier information.

- Click on the Registration Summary report to obtain a summary of your supplier reflecting verification and compliance status.

•Click on News to view the latest information, communication, help, and alerts from the CSD team.

•For suppliers, click on My RFQ to view, download RFQ supporting documents, and indicate whether they intend to respond to the RFQ or not.

•Click on My Inbox to view all communication and messages (including RFQs) from CSD.

•Click on My Orders to view order information from National and Provincial Government departments.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

1 This Standard Bidding Document (SBD) must form part of all bids[1] invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).[2] Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:

a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.

b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

[1] Includes price quotations, advertised competitive bids, limited bids and proposals.

[2] Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

SBD 9

CERTIFICATE OF INDEPENDENT BID DETERMINATION

I, the undersigned, in submitting the accompanying bid:

_____
R0169241870_____
_____

(Bid Number and Description)

in response to the invitation for the bid made by:

_____TSHINGOMBE TSHITADI / ST
PEACE COLLEGE
/_____
_____

(Name of Institution)

do hereby make the following statements that I certify to be true and complete in every respect:

I certify, on behalf of:_____TSHINGOMBE TSHITADI_____
that:

(Name of Bidder)

1. I have read and I understand the contents of this Certificate;
2. I understand that the accompanying bid will be disqualified if this Certificate is found not to be true and complete in every respect;
3. I am authorized by the bidder to sign this Certificate, and to submit the accompanying bid, on behalf of the bidder;
4. Each person whose signature appears on the accompanying bid has been authorized by the bidder to determine the terms of, and to sign the bid, on behalf of the

5. For the purposes of this Certificate and the accompanying bid, I understand that the word "competitor" shall include any individual or organization, other than the bidder, whether or not affiliated with the bidder, who:

(a) has been requested to submit a bid in response to this bid invitation;

(b) could potentially submit a bid in response to this bid invitation, based on their qualifications, abilities or

(c) provides the same goods and services as the bidder and/or is in the same line of business as the bidder

SBD 9

6. The bidder has arrived at the accompanying bid independently from, and without consultation,

7. In particular, without limiting the generality of paragraphs 6 above, there has been no consultation

(a) prices;

(b) geographical area where product or service will be rendered (market allocation)

(c) methods, factors or formulas used to calculate prices;

(d) the intention or decision to submit or not to submit, a bid;

(e) the submission of a bid which does not meet the specifications and conditions of the bid; or

(f) bidding with the intention not to win the bid.

8. In addition, there have been no consultations, communications, agreements or arrangements with any competitor regarding the quality, quantity, specifications and

9. The terms of the accompanying bid have not been, and will not be, disclosed by the bidder, directly or indirectly, to any competitor, prior to the date and time of the official bid opening or of the awarding of the contract.

[3] Joint venture or Consortium means an association of persons for the purpose of combining their expertise, property, capital, efforts, skill and knowledge in an activity for the execution of a contract.

SBD 9

10. I am aware that, in addition and without prejudice to any other remedy provided to combat any restrictive practices related to bids and contracts, bids that are suspicious will be reported to the Competition Commission for investigation and possible imposition of administrative penalties in terms of section 59 of the Competition Act No 89 of 1998 and or may be reported to the National Prosecuting Authority (NPA) for criminal investigation and or may be restricted from conducting business with the public sector for a period not exceeding ten (10) years in terms of the Prevention and Combating of Corrupt Activities Act No 12 of 2004 or any other applicable legislation.

DECLARATION OF BIDDER'S PAST SUPPLY CHAIN MANAGEMENT PRACTICES

1 This Standard Bidding Document must form part of all bids invited.

2 It serves as a declaration to be used by institutions in ensuring that when goods and services are being procured, all reasonable steps are taken to combat the abuse of the supply chain management system.

3 The bid of any bidder may be disregarded if that bidder, or any of its directors have-

a. abused the institution's supply chain management system;

b. committed fraud or any other improper conduct in relation to such system; or

c. failed to perform on any previous contract.

4 In order to give effect to the above, the following questionnaire must be completed and submitted with the bid.

Item	Question	Yes	No

	4.1	Is the bidder or any of its directors listed on the National Treasury's Database of Restricted Suppliers as companies or persons prohibited from doing business with the public sector?	Yes	No	

	(Companies or persons who are listed on this Database were informed in writing of this restriction by the Accounting Officer/Authority of the institution that imposed the restriction after the *audi alteram partem*	Y		

	The Database of Restricted Suppliers now resides on the National Treasury's website(www.treasury.gov.za) and can be accessed by clicking on its link at the bottom of the home page.			
4.1.1	If so, furnish particulars:			

	4.2	Is the bidder or any of its directors listed on the Register for Tender Defaulters in terms of section 29 of the Prevention and Combating of Corrupt Activities Act (No 12 of 2004)?	Yes	No	

	The Register for Tender Defaulters can be accessed on the National Treasury's website (www.treasury.gov.za) by clicking on its link at the bottom of the home page.			
		Y		
4.2.1	If so, furnish particulars:			

4.3	Was the bidder or any of its directors convicted by a court of law (including a court outside of the Republic of South Africa) for fraud or corruption during the past five years?	Yes	No	
		Y		
4.3.1	If so, furnish particulars:			

4.4	Was any contract between the bidder and any organ of state terminated during the past five years on account of failure to perform on or comply with the contract?	Yes	No	
		Y		
4.4.1	If so, furnish particulars:

Dear Tshingombe Fiston

Thank you for creating a CSD user account as the first part of your registration.

Please click on the activation link below to activate your account. The link in the email will direct you to the account activation screen.

Activate Account

https://secure.csd.gov.za/Account/ActivateAccount?U=6466af5d-eb6f-4b07-bd3d-021a2de411bb&T=1406664b-3084-4c6e-9ebe-9a457ae25079

You can request a new activation link from the login page should the current link have expired. Navigate to CSD System > Log In > Resend account activation email.

DISCLAIMER: This email and its contents are subject to our email legal notice which can be viewed at http://www.treasury.gov.za/Email_Disclaimer.html

If you did not intend to register on the CSD and would like to **unsubscribe** to CSD system generated emails, click on **unsubscribe** which will enable you to dis-associate yourself from a supplier or Organ of State or to delete a supplier master from the CSD.

Welcome, Tshingombe Fiston

Welcome to the Central Supplier Database for the South African government. Here you can maintain your supplier information to ensure accurate, up-to-date, and complete

The menu bar gives you access to various functions like links to other websites, reports, and help. The tiles below give you access to the most frequently used features of the system. A brief description of each tile:

- Click on Suppliers Details to add, view, or make changes to supplier information.

- Click on the Registration Summary report to obtain a summary of your supplier reflecting verification and compliance status.

- Click on News to view the latest information, communication, help, and alerts from the CSD team.

- For suppliers, click on My RFQ to view, download RFQ supporting documents, and indicate whether they intend to respond to the RFQ or not.

•Click on My Inbox to view all communication and messages (including RFQs) from CSD.

•Click on My Orders to view order information from National and Provincial Government departments.

N2 Electrical Trade Theory Lecturer Guide v

Lecturer guidance

1. General aims

####### e general aims of this course is to equip students with relevant theoretical

####### knowledge to enable them to integrate meaningfully into:

* an electrical apprenticeship;
* an electrical learnership;
* an electrical contracting environment; or
* a power utility environment.
2. Speci c aims
####### Students should acquire in-depth knowledge of the following subject outcomes:
* Alternating current circuit theory
* Conductors, insulators and cables
* Electrical reticulation
* Switchgear and protective devices
* Batteries
* Direct current machines
* Alternating current machines
* Transformers
* Earthing
* Measuring instruments
* Renewable energy.
3. Prerequisite
####### Students must have passed N1 Electrical Trade eory.

4. Duration
####### e duration of this course is one trimester full-time or part-time
5. Evaluation
####### 5 Trimester mark
####### Students will write TWO formal class tests and must obtain a minimum trimester
####### mark of 40% in order to qualify to write the nal examination. e trimester mark
####### shall be calculated as follows:
####### Trimester mark = 30% of Test 1 + 70% of Test 2
N2 Electrical Trade Theory Lecturer Guide vii
6. General information
####### e regulations as prescribed in the South African National Standard
####### (SANS 10142-1), as amended, must be used with each relevant section of this

####### curriculum.
####### All symbols and units of measurement must be in accordance with the following:
* IEC (International Electrotechnical Commission)
* SI (International System of Units).
####### Practical examples, realistic values and current data must be used in all calculations
####### and explanations.
####### Neat, fully labelled and large drawings must be presented when such are required.
####### Students’ artistic ability is not to be evaluated.
####### Students should be encouraged to provide in their answers the number of facts

####### according to the number of marks allocated.

####### For calculation-type questions, the following must be done:

* State the formula to be used.

* Show the substitution.

* Round off all answers to three decimal places.

* Show the SI unit.

7. Work schedule

Week Topic Content Hours 1 Module 1 Alternating current theory

1 Dynamically induced emf 1 Statically induced emf 1 e power triangle 1 rec phase circuits

10 hours

2 Module 2 Conductors, insulators and cables

2 Conductors 2 Insulators 2 Cables

10 hours

3 Module 3 Electrical reticulation

3 Reticulation networks 3 Generation 3 Transmission 3 Distribution

10 hours
viii Lecturer guidance
Week Topic Content Hours 4 Module 4 Switchgear and protective devices
4 Switchgear 4 Switchgear – isolating 4 Switchgear – control 4 Protective devices
10 hours
5 Module 5 Batteries
5 Gel batteries 5 Lead-acid battery 5 Lithium-ion batteries
10 hours
6 Module 6 Direct current machines
6 Function and construction 6 Operation of DC motors 6 Operation of DC generators
10 hours
7 Module 7 Alternating current machines
7 Types of AC machines 7 Single-phase motors 7 Tee-phase induction motors
10 hours

8 Module 8 Transformers 8 Function and construction of a single- phase transformer 8 Operation 8 rec-phase transformers
10 hours
9 Module 9 Earthing 9 e Earthing chain 9 Earthing of overhead lines 9 Earthing of underground cables
10 hours
10 Module 10 Measuring instruments 10 Low-voltage measurement 10 High-voltage measurement 10 Range extension 10 Digital measuring instruments
5 hours
Module 11 Renewable energy
11 Renewable energy 5 hours
TOTAL 100 hours

Dear Respondent,

Please note that a submission has been made online to the Commission for Conciliation, Mediation And Arbitration (CCMA) in which you have been named as the other party. The details of the case are summarised in the attached form completed by the referring party. Please quote the online reference number EGAEK0223008224 for all future correspondence.

Note that the online reference number is not the actual case number for your dispute. The CCMA will still capture the referral form and allocate a case number to it.

Kind Regards

CCMA Online Admin Team

CSD Registration Process

Inbox

cs

csd@treasury.gov.za 9:02 AM (3 hours ago)

to me

Good day Tshingombe

The Central Supplier Database is only reserved for the registration of the supplier's profiles wishing to have the business undertaken with the government. As such, nothing else besides the supplier profile registration or CSD related queries might be forwarded to this e mail address. If wishing to register, click on the below link:

www.csd.gov.za

You can then follow the guide below in order to register on the **Central Supplier Database**:

You are required to follow a two stage self-registration process:

STAGE 1: Create yourself as a CSD user

Ø Register your basic information on: CSD register

PASSWORD CRITERIA:

You need to have not less than 8 characters in all

You must have a capital letter e.g. K

You must have lower case letters e.g. ele

You must have a Special character e.g. @ or # or $ or %

You must have at least a number as well e.g. 1982

In full an example should be like this: Kele@1982

Ø Activate your account using the activate account link emailed to you; and

Ø Click on request OTP (one time pin) then enter the OTP sent via sms

STAGE 2: Complete supplier details

Ø Log in on: CSD Login;

Ø Click on “Accept” on the terms and conditions screen

Ø Click on “I Acknowledge” on the self-registration steps screen

Ø Click on “I Acknowledge” on the fraud screen

Ø Click on supplier details followed by add supplier

Ø Complete the Identification tab

Ø Complete the Industry Classification tab

Kindly select an industry that is the closest to the services your company provides.

Ø Click on supplier details

Ø Click on edit on your far right hand side

Ø Click on industry classification

Ø Click on “add/edit industry classification”

Ø Click on the small arrow on the left of the particular industry to expand the options

Ø Select the actual industry classification

Ø Click edit on the right on the row of the specific industry

Ø Drag the indicator to the right till it gives you 100%

Ø Then click save next to it

Ø Then save again at the bottom of the page

e.g.

..

Ø Complete the information on the Contacts tab

Ø Select the preferred method(s) of communication

Ø Add the telephone/fax/toll-free numbers where applicable

Ø Add the website address if applicable

Ø Complete the information on the Address tab

Ø Click “add address” tab

Ø Select “physical” on address type

Ø Add the physical address details

Ø If the physical address is the same as the postal address, tick all 4 check-boxes

Ø If the postal address is different from the physical address, click add address after saving the physical address

Ø Select postal address

Ø Add postal address details

Ø Click “save”

Ø Complete the Bank information

Ø Click on bank

Ø Click on add bank account

Ø Capture the Account Holder name as it appears on the Bank confirmation letter

Ø Request the OTP (One Time Pin) and capture it

Ø Click the save button

Kindly note that your banking details will be sent for verification and may take up to 4 business days to be completed, you will receive a response email once validation is complete.

Ø Complete the Tax information

Ø Click on supplier details

Ø Click on the edit icon

Ø Go to the tax tab, click on edit tax details

Test daily week time load

Relever trade. Integral derivation day

Unity descrition	Yes/not
Equation of sychronouse motor .	
V=Eb+Ia(Ra+Jxs).	
Voltage v.eb back EMF .is armature Ra armature resistance .on system day working duty shift	
-resultant voltage: difference between the voltage applied v.and back EMF,	
E=V-Eb,. Er=Is.(Ra+jx.s)	
Back EMF generated:	
Eb=ka.¶a.Ns	
¶a= constant of the armature,¶acmagnetic flux perpoles, NS = synchronous speed of the rotor	
.En=v normal excitation lagging power factor EB<v under excited.over excitation.	
Input power: input of synchronous motor	
.Pin=v.Ia.cos¶ per .phase	
.Pin = √3.v.I.Il cos 3phase ..	

Mechanical bpower in rotor
Pm=Tg.NS
Pm=En.Ia.cos(a-¶).
.
Pin =√3.vl.il.cos¶-3.I square.ra..
Pm=pin -Ia.Ra..
A load angle between en and v, angle between band Is ,the is gross torque products .Na is per synchronous.
- stepper motor Ster angle ..£=(ns-nr/nsxnr)x360.
Step angle the angles of rotation of shift .NS = number of stator / number..poles .Mrs of poles
Motor asynchronous..nr-ns/NR slop squirrel..star current as..z.c .p.
DC motor machine ..
Resolution 360degre/ beta accurate of stepper .n motor speed.n.
Requireded learner induction machine system engineering electrical St peace generation GB ..machine system hr resource compatible run
.-transformer three phase
Connecting start delta zig zag.primary wind , secondary winding, . interconnected order phase clockwise power .
Y...VP=Vl÷√3. Vol=√3xvp...

D. VP=vl...vl=p..	
Y.Δ. Turn ration	
TR=NP/Ms=VP/√3.v.s.....1/2....step=1/,√3 Δ.y....TR=Np/NS=√3.vp/v.s	
.Delta delta line vol primairy secondary vl~n.vl...line current primary IL/n.	
Delta star vl_ √3.n.vl. ..Il = IL/√3.n	
Start delta ..vl n.vl/√3...IL=√3.il/n..	
Start start vl =n.vl I=IL=IL/n...	
Estimation data 50 Va supply,line voltage 100v , primary turn 500, secondary turn 100, n=NS/nP=100/500=0,2	
..vline sec =√3xnxvline	
=√3x0,2x100=34,64volt	
-V phase sec = v.line /√3=34,64=√20 v.	
ILine (p) = Va/√3.v line =50/√3x100=0,289 Am..	
I sec = ILine = ILine (per)/√3*0,2=0,834 amp.. construction...	
Transformer voltage regulations..	
Voltay regulation or percentage value by which transformer output terminal voltage varies, up or down from it load value...	
Condity when IL = 0 open circuit to fully load IL= iMac maximum current for a constant primary.	
, Regulation=change in output voltage/ no -load out voltage	

Regulation = v(no load)- v (full-load)/v.no -loAd..	
- percentage	
% reg (down)=v(no-load)-V(full load)x100%/ v no load .	
% reg (up)= v(no - load)- v (full load x100%/v.full load..	
Estimation transformer has open circuit no load terminal voltage 100 volt and same terminal voltage drop 95 volt on application of connection load transfo regulation ..0,005 or 5% ..(100-95)/100*100%	
V1 <E1...E2=I2.Ro.xos2+I2Xo2.sin&2+v2	
V2>E2..E2-V2=I2.Ro2.cos2+I2.xo,.	
Capacity load x 100%

40.9. requireded maintenance ..maximizing equipment effectiveness: measuring availability .
Availability= operation time/loading time
#NAME?
Available=400 minutes/460 minutes ×100=87.
-operating =0,5 minute/0,8 minute ×100=62,5%
-net operating rate = actually processing time /operation time
#NAME?
Net operation .

Rate =400item ×0,8 minute ×100/400minute ,
Performance efficiency= net ,= operating speed ,
Processed amount x actual cycle time/ operation time
= 400(item)×0,5 minute ×100/400 minute =50%
0,625×0,625×0,80×100=50%
-A . workings hours per days 60 Min ×8h=480min
-B.plane down time scheduled.
C. Load time per day =A-B= 460
D: stop losses perminute break down,20 minute.
E: operating meter day ,C-D= 400 minute
G: out per day =400 items
H: rate of quality products 98%,

I: ideal cycle time :0,5 Min / item
J: actual cycle time =0,8 Min
F: actually processing time =jxG=0,8×4000.
T: availability=E/c x100=400/460×100=87%
M: operationel rate = I/j×100=0,5/0,800×100=50%
-Overall equipment effectiveness=T×L×H×100=0,87×0,50×0,98×100=42,8
-equipement.: 1Loading time ,operating time ,net operating time,
2Sigx bx bag loss: equipment failure,St and adjustment, idlian minor stopp,reduce speed ,
Calculation of overall equipment

-1availability= loadtime -downtimex100/ load time.
- 2available=460 min- 60 Min×100/460=876
-3performance theoretically cycle time×process/time operating
Performance efficiency=0,5 Min ×400 unit/400 ×.100 =50
Rate of quality = processed /amount defective/processed .
Rate of quality products=400 units -8 unit /400 ..
Overall equipment= availability ×performance Efficiency ×role of quality..

-position advance engineering advance entrant as senior an .

Advanced engineering had scope of knowledge. Engineering average 45 hourly salary.

-Advanced engineering jobs: advanced engineering career paths a long your career taking responsibility leadership role using our career map, career goals, the career progression , senior engineer ,progress to a title senior.

-advanced engineering manage engineer , senior engineer 12years

-senior engineering, senior project engineering, mechanical engineering

-senior engineering, senior mechanical,

-senior project information technology.

Principal engineering.

Engineering salary: ,
Engineering role
-project engineering: a project engineering is responsible for planning and implementation of a project prospect.
-manufacture engineering: work industrial or design cost.
Number of advanced.
-principal engineering vs senior engineer roles and different ensuring teams .collaratively research design , analyse,and inspiration structure client requirements,
-specifie projects field experts between.
-principal engineering is an engineering professional many year of experience ,oversee project staff working ,role principal leadership c project time budget.
-Do planning engineering department in task like research and design .
-determining department goals creating implementation plans.
-providing expert advice to other engineering.
- creating and managing engineering budget ,
- negotiate contract vendor , implementation process.
-senior engineering earn title handling several projects simultaneously performance task of engineering.
-ensure teams apply concept to
-Generating report and writing project proposal.
Presenting design and research to customer.
-advising staff with process recommandation .
-negotiating project management
-junior vs senior vs staff engineering career progression is a topic.

-junior engineering level engineering focus mostly.
Demonstrating the coding capability,
Level understand code base and drive assignment requested to improve it migration framework, adding test design well organisations.
-Task disciplines designing.
-senior engineering.bea able breakers down and complete a project of a large scope with high level productivity.
-proactively find problem of existing system products, be able to load .project with build activities like interview.
-staff engineering: engineering identify solve a technical problem.
-be able to implement the hardest part of system products.
-be able ship high quality work, practice.assess , additional demonstrate.
- engineering grades , ranking job title public sector level of seniority.
- engineering schedule gov,
Engineering ranking.engineer in training.
Engineering intern assistant engineer , junior engineer staff engineering engineering instructor .
-responsible : for grade from basic data collection working on small projects, adapting metho to finish work , . level6 employee beginning need guidance aspects job , senior employee complex.
-experience and education: level typically bachelor's degree,grad engineering,

-responsibilitee:, design and work moderator project or part large projects presenting project specifications customer ,contractor official engineering.
-experience and education:
4 .electrical engineering : do designing and building electrical equipment advance technology outcomes includes electrical skill improving products.
-creating electrical engineering meat, mathematics abet , emphasize,your skill focus .
Resume structuon.
Experience over 10years power station transmission and distribution technically -skill specifical:
Circuit design and java programming contributing to developing a large hydroelectric installation an experienced team manage circuit ,
-an experience team manage circuit .
Skill technical autocad circuit design electrical measurements.
-workplace skill communication critical leadership innovations.
4.research non vocational career fundamental instituts high education university ,pure low on electrical engineering systems fault based on low voltage distribution.power supply.
Analyse network is it safe operationel level affect economic social benefits of power supply.
-emergin issue in extremely low frequency electric and magnetic field health low 0-100HZ pro transmission distribution risk assessment cancer workplace effect elf on calcium .
-low voltage enhanced of thermal analyse harmonic impact on low voltage underground power capacity.

Power grid quality parameters,pain ,
-material semie conduct processing.
Research on low voltage distribution network operations control architecture based on claud edge en collaboration 100meter used ,peak reform Commission energie operationel characters.
5.Best career advice for aspiring electrical engineering expect from job electrical engineering life cycle of electrical project design phase delivery work.
-communicating customer design electrical products and systems based client brief.
-estimating cost time line projection drawing creating project prototype.
-estimating cost and timeline for project delivery.
-interpreting technical drawing and design specifications.
-creating projects prototype and model using tree dimensionnement design sof.
-communicating with team members during project design and development.
-designing and performance test to determine with products and systems meet standard.
Recording and evaluation test data.
-proposing electrical products and systems modified improve quality.
-restesting electrical . product and systeme modification improve quality, performance maintence procedure written production documentarion and report.
-Giving presentation about project.
-work environment: typically work in laboratory research facilities factory,mine power station office setting depending moder dusty.

-schedule 40hvbusiness work ,

-skill engineering job description problems solving skill
electrical engineering must solve complex problem
troubleshooting,creative ,fine new decisive project

-Assessment guidelines orientation:

Engineering orientation vocational

Conductor learner engineering. Learner except employment

Assessment policy : engineering conduct policy engineering
electrical tpm

6.requirement assessment police and orientation learner
guidelines vocational training engineering electrical

Police traffic low.assessement engineering.

-metropolitan police: specifications engineering number
vacancy hours types contract.

Vision job advert band.

-police and crime plan changing operational demands affect the sizes, make up deployment fleet met are currently exploring option to support the acceleration decarburization to achieve net zero carbon, by 2030 over 750 alternative fuel vehicles already zero -emission capable vehicle transition away from reliance on petrol diesel 5000 vehicle, 10000pedal cycle, 25marune vessel, officer and staff to carry job workplace safe environment for transportation public prisoners.
-vehicle. Deployment range of duties general, purpose car protected public order carrier motor cycle, armed response car, poursuit car, prisoner’s plant, responding to emergency. Mall fleet services provided professional.
-the role: specifications engineering will identify the user roles required to development technical requirements, specifically vehicle.
-key responsibility.
Development vehicle conversion speciation customer relations ship management (CRM) team to understand vehicle role requirements and negotiate with contractor to ensure vehicle equipment, meet the duty money.
-acting as design authority development maintence statement detail building.
-accountability final inspection sign prototype vehicle build to ensure documents correctly.
-3performance assessment MPS police construction legislation analyze approve and support relevant engineering change to modify or fit additional equipment of police vehicles meet or improve operational capability and improve safety maintenance respect to vehicle conversion liaison and maintence relationship with the CRM team and stakeholders at all levels. Ensuring vehicle design or building queries are reserved.
-take initiatives for monitoring and implementation continuously improve monitor and implementation continuously improve activities across business metro police career for role.

-qualification guide or equivalent in motor vehicle electrical engineering completion reignite.
Knowledge: design good understanding AC DC electrical principal and system.
-result expiremental.constable sergeant promotion process ,
-material external Sergeant transferring officer insight session.
-SAPS gov.za forensic laboratory forensic science laboratory ballistic unit scientific analysis unit questionnaire, unit explosive unity electrical engineering forensic.
Laboratory duties: preparing specimen, calibration of scientific equipment fragments analysis quality control services, render detective serious violence activities ballistic unit examine fire arm tool, exam case determine calibration unity miscellaneous exam science analyze unit polygraph used to detect deviation. Investigation fire exploinsion DNA drogue.
-policing and low enforcement technologies intelligence artificial automation big data evened reality technology smart devices case computer version detection of crime before happen research an going applying to create prediction algorithms CCTV, robotics enforcement dangerous technologies probability autonomous ,radar system radio ,
-orbital solar power plant for energy base research spatial energy power plant private sector project..

LOCATION: Division: Technology Management Services: (Pretoria)
REFERENCES: TMS 36/2019 (1 post)
Generic Requirements:
· Applicants must display competency in the post-specific functions of the post;
· Be in possession of a Senior Certificate (Grade 12),
· Be a SA Citizen,
· Be fluent in at least two official languages, of which one must be English;
· Be in possession of a valid light motor vehicle driver's licence. Must have no visible tattoo/s when wearing summer uniform.
· Must have no previous convictions or pending criminal/ departmental cases pending.
· Applicants will be subjected to a vetting process which will include security screening and fingerprint verification.
· Organizational skills. Computer literacy (MS Word, MS PowerPoint and MS Excel) will serve as an advantage.
Additional Requirements:
· An NQF 6 in Electrical Engineering or NQF 4 certificate or equivalent with minimum 2 years' experience in the field of post or National Technical Certificate level 3 (N3) in the field of Electrical Engineering light current / telecommunications (Electronics) with minimum 2 years' experience in the field of post or NQF 3 certificate with a minimum 5 years' experience in the field of the post.
· Having successfully completed the following courses Radio Installation, Frequency Modulation Principles and Basic Electronics (applicable to all applicants except applicants with NQF 6 in Electrical Engineering).
· Must be willing to work with heights.
· Trade Test in the field of the post and/or certificate in fall arrest / rope rigging will be an added advantage.
Core Functions:
· To conduct repairs, installation, removals and maintenance of radio equipment for the SAPS Radio Technical Unit.
· To do radio infrastructure installations at SAPS Radio High Sites.
· To conduct preventative maintenance at SAPS Radio High Sites.
· To work and perform operating test equipment (Communication Monitor, Signal Generator, Oscilloscope).
· To analyse and trace radio infrastructure faults.
GENERAL:
•Only the official application form (newly developed form is available from all police station, on the SAPS website www.saps.gov.za and at the SAPS Recruitment offices) will be accepted. All instructions on the application form must be adhered to and previous criminal convictions must be declared; failure to do so may

result in the rejection of the application. The post particulars and reference number of the post must be
correctly specified on the application form.
•Persons who retired from the Public Service by taking a severance package, early retirement or for medical
reasons, as well as persons with previous convictions, are excluded.
•Comprehensive Curriculum Vitae must be submitted together with the application form.
•Certified copies of an applicant ID document, valid motor vehicle driver's license and all educational
qualification obtained must submitted together with the application form

RESEARCH PLAN

1. Research Plan Templates for:

1.1. Scientific Investigations Projects/Experiments

1.2. Engineering Type Projects and Computer Science Projects

- For these types of projects,
- a design process is followed according to criteria, to build and test-redesign-retest a prototype/product/solution e.g. a device or a computer code

1.3. Social Sciences Projects

- Social Sciences research involves an objective and systematic method of exploring and analysing human behaviour, social issues and other phenomena. It involves collecting qualitative and/or quantitative data

1.4. Mathematics/Theoretical Projects

- Mathematics projects explore quantity, structure, space and change. Starting with an observation, problem or question, make conjectures/hypotheses, prove your claim using new or existing methods, make valid deductions and test your ideas theoretically. Your reasoning and arguments must be logical

-lesson plan:

-Nano technology and water

What is nanotechnology,

How small arbobject nano technology,

Where does our water come from ,

How can nanotechnology make safe to drink.

Activity 1,2,3 extension activity.
, -nano technology and mining , wath is natechnology , wath are the danger of mining,how is nanotechnology being used to make safe , activity,2,3 ..
-nanotechnology and energyb,where does ours energy come from,non renewable and renewable energy source ,how can nanotechnology help to build better solar panel , activities,1,2,3:..
.nanometre..
- the are used nano technology science very small ,object ,,..
..
..discy, ..
- apparatus , investigation, write an investigation Questions, write a hypotese for your investigation, procedure for the investigation ..make sure that your hypotheses give a clear idea of step you need ,
- connect your equipment so that you have build circuit shown diagram, beginning by including as completed the circuit observe brightness of the ligthbub, now,observe the brightness of the ligthbub with this shorter length,, torch ,wire pencil lead,wire,, now decrease the length pencil lead that has been included in your circuit once , observe the brigth of the ligthbub with this shorter length of pencil lead ,record your observations,
-analyse your data. Assume the brigthness current and resistance do you notice from observations,
-Write a conclusion.
Write a clear conclusion to your investigate..
Activity:
Describe the mining danger ,,

-activity : in group of 5 ,6 learner design and draw a poster showing how nanotechnology is being used to build gas sensors for mines,
- make your poster as clear and colourful as , .
- you teach will assess your using criteria.
- poster is colour and creative , 2 marks,poster shows original idea 2 marks, poster is clearly presented , 2 marks,information on poster is informative. 2 marks, group work learner were included 2marks ,total 10 marks.
2.how to build yourself a bright technical future.
- considering a technical career,..
- let s get down to work ,
- how do I pay for ..
Technical and artisanal not so low skilled job fact skilled,
Revolution age material age skill..
Myth and facts about technical careers .
Myth choosing a technical course will lead a low paying job , career regards status compare,gate stuck on your career ,technical career are not for women ,is dirth work,there is not room for creativity in technical career
Fact : a well qualified technicians or artisan is high demand and will earn good salary , need RSA job technical low, women do justas these career, workplace need clean
, Engineering challenge are practical problem and many need creation nthar where qualifirv,,

.are you fascinated by how something,piece make it up together,do you prefer to make things instead of reading aboutg ides ,doubyou enjoy solving puzzles and problem,does working in team make happy ,would you like to run your business ones day a career as artisan or technicia ,, mechanitechnique , electrical,civilengineering technologist

, Let see what you are good at , it can difficult to decide what your are good at what career you want doing is to use a theory designed, six broad type, realistic,investigative,artistic ,social,entreprise, conversation, occupation personel,

-Are you realistic,are you pracal, CA you fix electrical things,do like explore machine, wath score

-are you investigative , are inquisitive ,can you things abstractly, do you like to explore ides,,analytical solve math problem use computer wath score,

- are you artistic are you creative , sketch draw or paint all ,solve problem in original way, intituive ,use intutii.read stories,play and poetry,imagine,,are you social are you friend can you teach or train other,do like to use social or interpersonal,are you enterprises,are you self confidence,star project ,do you like to make that affect,

- so what now ,how do you get there ,

Registered Education institut NQF qualifications.

Career career Pathways, ,school need subject ,wath exactly the Engineering technology field ,electrical,career pet for part..

- birthday planetarium, science activity, ,erupting apples, planetarium show,science show, graphite circuit

Climbing wall package,

Subject in the national curriculum statement grade ,10-13..

Learning field ,elective subject, you need to have selected subject, subject refer to the ,

-comulsory subject ,home language n,first language,pure math ,

Human social studies ,physical computer, business comeerce managent ,service manufacture eny, design technology, electrical technology,eny graphics design,mecanic

Engineering it... discovery Computer , training , development and support services to existing or prospective , club house safe creative space to learner aged ,prepares learners for full participation in the 4IR and provide exposure to coding ,robotics ,sebt development, graphic design,3 d design ,2 D and 3 D modelling, animation,video production, basic computing , virtual art , year full time development program 180 unemployment youth aged training including cisco,it Ccma ,ccna security Linux,IoT ,C,C++ , python , essential skills and career readiness, instructor training centre essential ,ccna routing and switching ,ccna security ,ccna cybersecurity operation,to existing or prospective , custome accreditation custome 3,_4 day module ,word,excell,access,Nd power point ms office,speciistr training,it also digital literacy, skills, certiport examination ms office , specifical, delivery fundiy depending learner full standard ,..

Lesson teach note:

What's is nanotechnology: is NM one billion the length of matter to pir perspective, diameter average bacty 2500nm long material 100nm nano matert,,,nono scat material, involved the product manipulation nanoscale material products ,nanosciet consists discot and character,

-activity fields nanotechnology, @0 years research plan research ...

- the electronics industry,wath is distinct need between electrical appliances and electronics electrical appliances and t flow of charged particles electronics in this metal conductor copper wire ,found electrical cord home appliances non metallt conductor ketler ,electron ,non metallic conductor semiconductor found cellphone..

-nanoelectronics current and future applications.

- origins of nanoelectronics: ,100 atoms ,

- computer hips semiconductor industry:

CPU ,central pro easing units found computer, transistors embedded in silicon, calculatioy per second required keep ,replaced out data technology tubes 1960 s , accordiy to Moore's low named after ,PC transistor ,45 NM ,process 47 million nanoscy transistor distrt accross 26 mm ,compone computer,,

Components found quick retrial storage data volaty data abscen d use carbon nanotubes , computer switch data retention,data recovery during power cuts,

- molecular electronics: decrease in size components molecular emerge task performance ,capacitors in electronics device ,capacitor store information, molecular been investigated act incredibly single electron .

- organic light emitting diodes OLEDs : television and computer monitor ,electronic device Thea days particularly handled device mp3 player ,ligth emirtur ,OLED organic light. Emitting diode 100nm packed betwt conducting film called electront film voltage causes energy ,compare OLED ,screen film, product,
- touch screen : technology as found in many table ,palm computer ,smart phones and news laptop,works , digital signal to control device interwar , layering of conductive film of indium tri oxide Ito , which conductor relay the ,x- y coordonne to processing components of the device ,smart ,ITO , technology.
1 nanowire can produced to high conductive transparent subnano wire network allowt hegher screen brightness ,with option of producing flexible screen Ito film,
- improvement batteries:
Devet in battery,lio batteries ,smart phone ..
- risk and safety issue: unique physicochemical properties of nanomaterial electronics industry , safety humait,nano party,microsct,mass ratio risk asst , hazardous nanopt,national occupation health ,incorporate.
- key issue to consider : renewable water energy have lagged ,, chip manufacture capabilities.
- future risk assessment:
The future nanotechnology in the electronics industry:
- conductor,:material that can transmit heat ligth ,electrical charge in case electrical conductor
electrical conductivity mesure of electrical current move through material it can see. As opposite of resistance,
- semi conductor : a material that can conduct electricity.under specifical circulum voltage current flowing through common material .

- led technologie: ligth emitting diode are semie conductor device emit light as current from anode to cathode .to cathode energy from of photon ,is release electron through the led device bprocess called electroluminescence,

- transistor , semiconductor terminal current flowi between b,

-capacitor ,an electronic components store electrical charge consiste two conductive plate separate ,

- electrodes , the anode is the electrode oxidation reaction takes place reduce,

- graphene. Two dimensional one atom carbon atom bonded hexagonal the crystalline alloyrip structure a pure element ,pencit lead ,carbon nanotubes,hallow cylinder consistent,nested comprised of carbon atoms ,spherical carbon fulleren composed entirely carbon atom in bKk shapp also called buckbakk and buckmnjsterful,they commonly consist 60 or 79 carbon ,physicJ property , of substance relating to both it's physical chemical.

-Metering screen ,ITC manufacture nanotechnology transmission component automate ,,

Synchronouse system , synchronous intelligence it ,

-explanation: calculation impedance of power source the up streav network the power supply transformers as well as of the electrical lines

Problem consider a 20kv network that supplies a HV / LV substation via 2 m overhead line and MVA generator that supplies in parallel the busbare of the same substation two 1000kva parallel connected transformers euply the LV busbar which in turn supply 20out gears to 20 motor

-point A on the HV busbars with a negligible impedance.

-point B on the LV busbar,at a distance of meter from the transformer.

-Point c on the busbar of an LV su distribution board .

-point D at the terminal of motor Mthen the reverse current of the motor must be calculated at C and B

up then D ,A

Explain:

LIGHT System for an out door area ,
Main height,
- highest illumination level produced away from a flood light location occurs when the maximum flood light candela value
-3. Determine utilisation factor.
Area ,2 mainting height (2×10m=20m)
Height (4×10m=40m)long flood light is aimed ,13/10,
X÷MH=tan @÷cosπ
-Aiming line ,
Vertical angle , in line distance , maintenance,
-Lateral distance (x)÷maintenance (MH)
-foot candles /10.00 candelas ,
Mounting height =31,6ft,
Lux /10000 candle mounting height =10m

- calculat the level illumination
Average lux = (LL)(cu)(LLD)/area =(51.00)(0,4168)×(0,9)(0,95)1(20)(40)=22,7lx
-maximum averag Luz ,30,600w

Lumen distribution ,- isocandela , curves ,, photometric data for flood light in out door ,agree light design
----
Factor to consider : level for activity luminaire.
- light -loss factor light loss factor ,
-level of illumination, extensive information on selected appropriate
-ligthing source selection cost of energy to operate light .
-coefficient of utlization (cu) the coefficient of utlization important factor ,
- deternationof illumination categories

Level

A.public space. 30lx(FC)
B.simple orientation. 50lx(5fc)
for short visit
C.working space 100lz(10fc)
where simple
visual

Common visual task visual performance task commercial residential applications recommend
----
D. Performance of visual task of high contractor and large size. 300lx
E.performance of visual task high contrast
F.performance of visual task of flow contract ,500Lx(50fc),,,, 1000Lx (100fc)
G. Performance of visual task near
3.000 to 1000lx , 300to 1000fc

----------_--_-

Point is long aiming line is located 63° ,or 2MH,this point is between the 0,8 - LX and ,1.0 line ,so the value ,0,9 can be give point a is ,10° above the aiming,point of 53° this matches the isocandela curve ,marked 400,the candela value this problem ,400 substituting ,formula point a yield

-lux = (0,9)(400/1000)(90.000/1000)(0,88)(0,95)(1)=27,0lx

Point B,is located at horizontal angle of ,42 and the vertical angle is ,10° substitute in the formula,

Lux =(0,38)(400/1000)(90000/1000)(0,88)(0,95)(1)=11,5lx

,point c

-Roadway ligthning system:

Information already that street width is 20m the mounting height is 12m and the over hand of the luminaire is 2m the required overage maintenance level of illumination is 16 LX it necessary to. To determine the stagger spacing required to determine t staggered spacing ,require to provide the specific illumination level as well as the uniformity bof illumination with.

- explain. mounting height used in chart is 10 m to calculate the level of illumination at any point following

Lux=[lux(from chart)](Cd/1000)(LL)/(LF)(LLF)(MHct)

-lux (from chart) =illumination in LX /100cd
-cd=candela value taken from the photometric data isocandela curves at the same horizontal and vertical angle as indicated by the chart must be corrected by dividing by 1000)
-total lumens falling on outdoors area lighting system.

-explanation: calculation impedance of power source the up streav network the power supply transformers as well as of the electrical lines

Problem consider a 20kv network that supplies a HV / LV substation via 2 m overhead line and MVA generator that supplies in parallel the busbare of the same substation two 1000kva parallel connected transformers euply the LV busbar which in turn supply 20out gears to 20 motor

-point A on the HV busbars with a negligible impedance.

-point B on the LV busbar,at a distance of meter from the transformer.

-Point c on the busbar of an LV su distribution board .

-point D at the terminal of motor Mthen the reverse current of the motor must be calculated at C and B

up then D ,A

Explain:

LIGHT System for an out door area ,

Main height,

- highest illumination level produced away from a flood light location occurs when the maximum flood light candela value

-3. Determine utilisation factor.

Area ,2 mainting height (2×10m=20m)

Height (4×10m=40m)long flood light is aimed ,13/10,

X÷MH=tan @÷cosπ

-Aiming line ,

Vertical angle , in line distance , maintenance,

-Lateral distance (x)÷maintenance (MH)

-foot candles /10.00 candelas ,

Mounting height =31,6ft,

Lux /10000 candle mounting height =10m

- calculat the level illumination

Average lux = (LL)(cu)(LLD)/area
=(51.00)(0,4168)×(0,9)(0,95)1(20)(40)=22,7lx

-maximum averag Luz ,30,600w

Lumen distribution ,- isocandela , curves ,, photometric data for flood light in out door ,agree light design
----
Factor to consider : level for activity luminaire.
- light -loss factor light loss factor ,
-level of illumination, extensive information on selected appropriate
-ligthing source selection cost of energy to operate light .
-coefficient of utlization (cu) the coefficient of utlization important factor ,
- deternationof illumination categories

Level

A.public space. 30lx(FC)
B.simple orientation. 50lx(5fc)
for short visit
C.working space 100lz(10fc)
where simple
visual

Common visual task visual performance task commercial residential applications recommend
----
D. Performance of visual task of high contractor and large size. 300lx

6. Company Zip Code

10300

7. Company State

AK

8. Company Website

htpps//:www.tshingimbefiston.com

9. SBIR/STTR topic that best fits your projects technology area

Advanced Manufacturing (M)

Are you eligible and interested in being considered for the NSF Fast-Track program?

Yes

Please provide details of the NSF research funding relied upon to meet the eligibility

requirements, including: NSF research award number(s); the proposing company personnel

involved in each of the listed research awards and their roles in the research awards; and a brief

explanation of how the cited research funding relates to the proposed Fast-Track project. (up to

150 words)

Engineering electrical master skill ,manufacture

Please provide details of the customer discovery training relied upon to meet the eligibility

conditions, including: a description of the customer discovery training program(s), with

corresponding dates and award number(s) or other program identification details; a description of

the technology in relation to which the customer discovery was undertaken, and a summary of the
customer discovery findings. (Up to 250 words) Engineering electrical manucture electrotech
Please check the appropriate box below to indicate whether the proposing Fast-Track team will
be complete at the time of proposal submission.
Yes
10. Is this Project Pitch for a technology or project concept that was previously submitted as a full
proposal by your company to the NSF SBIR/STTR Phase I Program – and was not awarded ?
Yes
Please provide the Proposal Number of the previously submitted full NSF SBIR/STTR Phase I
proposal ?
1234567
Have you contacted the associated NSF SBIR/STTR Program Officer, via email or phone, to
discuss this prior full proposal submission?
Engineering electrical
11. Has your company received a prior NSF SBIR or STTR award?
Yes
Please provide the Proposal Number of the previously submitted full NSF SBIR/STTR Phase I
proposal ?

1234567

12. Does your company currently have a full Phase I SBIR or STTR proposal under review at

NSF?

Yes

13. Briefly Describe the Technology Innovation?engineering electrical- Proposal of thesis content / final project

engineering electrical

16. Briefly Describe the Company and Team?

Engineering electrical master

17. How did you first hear about our program?

NSF email, webinar, or event

NSF SBIR/STTR Phase I Eligibility Information:

In addition to receiving an invitation to submit a full proposal from the NSF SBIR/STTR Phase I

Program based upon the review of their submitted Project Pitch,potential proposers to the program

must also qualify as a small business concern to participate in the program (see SBIR/STTR

Eligibility Guidefor more information).

The firm must be in compliance with the SBIR/STTR Policy Directive(s) and the Code of Federal

Regulations (13 CFR 121).

• Your company must be a small business (fewer than 500 employees) located in the United

States. Please note that the size limit of 500 employees includes affiliates.

• At least 50% of your company’s equity must be owned by U.S. citizens or permanent residents,

and all funded work needs to take place in the United States (including work done by consultants

and contractors).• Primary employment is defined as at least 51 percent employed by the small business. NSF

normally considers a full-time work week to be 40 hours and considers employment elsewhere

of greater than 19.6 hours per week to be in conflict with this requirement.

• The Principal Investigator needs to commit to at least one month (173 hours) of effort to the

funded project, per six months of project duration.

For more detailed information, please refer to the SBIR/STTR Eligibility Guide by using

https://www.sbir.gov/sites/default/files/elig_size_compliance_guide.pdf. Please note that these

requirements need to be satisfied at the time an SBIR/STTR award is made, and not necessarily

when the proposal is submitted.

Optimization of Microgrid Systems
oInvestigating AI-driven optimization for hybrid renewable microgrids.

oCase study on cost-benefit analysis of microgrids in remote areas.
Smart Grid and Energy Storage Technologies
oEnhancing demand response strategies using machine learning.
oOptimization of battery energy storage for grid stabilization.
Wireless Power Transmission
oDeveloping high-efficiency resonant inductive coupling systems.
oApplications of wireless power transfer in electric vehicles.
2. Control Systems and Automation
AI-Based Predictive Maintenance in Industrial Systems
oMachine learning for fault detection in power transformers.
oPredicting failures in rotating machinery using deep learning.
Advanced Robotics and Control Algorithms
oAdaptive control for autonomous robotic arms.
oPath optimization algorithms for multi-agent robotic systems.
IoT-Based Smart Home Automation
oImplementing AI-driven smart home systems for energy efficiency.
oSecure communication protocols for IoT-based automation.
3. Embedded Systems and Internet of Things (IoT)

Edge Computing for IoT Devices
oImplementing real-time AI inference in low-power embedded systems.
oOptimization of edge computing frameworks for industrial IoT.
Wearable Health Monitoring Devices
oDeveloping ECG monitoring using flexible sensors and AI analysis.
Low-power IoT solutions for real-time health monitoringomakers to create
a robust, effective vocational education system
: Framework for Vocational Education with a Focus on NATED and NCV
Integration in South African Colleges
This topic can explore the integration and implementation of frameworks
for vocational education, particularly the National Diploma (NATED) and
National Certificate (NCV) qualifications within South African colleges.
The research would focus on how these systems can be effectively
combined to address challenges in vocational education, experimental
facilities, policy irregularities, and workplace-based learning.
Introduction to the Framework for Vocational Education
Overview of NATED and NCV

oThe National Diploma (NATED) and National Certificate (NCV) are the two
key qualifications within South African vocational education, designed
to enhance the employability of students.
oThe NATED qualification offers a more academic-based approach, while
the NCV focuses on practical skills training aligned with specific
trades.
Objective of Combining NATED and NCVoObjective: Explore how combining the NATED (academic) and NCV
(practical) systems can provide a more comprehensive, holistic
vocational education model.
oGoal: Enhance industry readiness and workplace skills by addressing
policy inconsistencies, improving management systems, and ensuring
strong work-based learning components
. Experimental Framework and Integration
Experimental Approach:
oIntroduce experimental frameworks to ensure both theoretical knowledge
and practical skills are addressed.
oImplement real-world case studies, hands-on training, and industry

feedback mechanisms to ensure the combination of theoretical and

practical education is balanced.

Curriculum Structure:

oDesign curriculum modules that address both theoretical coursework

(NATED) and practical skills (NCV).

oProvide a blended learning approach that mixes online learning,

classroom lectures, and workplace training.

15. Briefly Describe the Market Opportunity?

Project Description (Research Proposal Structure)Project Description

(Research Proposal Structure)

1.1 Proposal Section Research

Objective: This section should outline the primary aim of your research.

It should highlight the problem you aim to solve or the gap in knowledge

that your research will address.

oExample: "This research will explore the integration of machine

learning in electrical power systems to improve efficiency in load

shedding management."

1.2 Rationale

Why this research is important: Justify why the research is valuable,
its social, economic, or scientific impact. Provide insight into the
relevance of the study in your field.
oExample: "The study will provide solutions to the critical issue of
power supply reliability in developing countries, where load shedding
impacts industrial productivity."
1.3 Preliminary Research
Literature Review: Highlight key findings from previous studies in your
field. This shows what existing research is available and where your
work fits within it.
oMention gaps, contradictions, or opportunities that your research will
address.
16. Briefly Describe the Company and Team?1.8 Proposed Educational Activity Integration
How this research integrates with education: Discuss how this project
can be used in educational settings, either through curriculum
development, workshops, or by providing a learning opportunity for
students.

oExample: "This research will integrate a training module for

engineering students to learn about AI applications in power systems,

preparing them for the evolving energy sector."

1.9 Team Description and Expertise

Research Team: Outline the qualifications, experience, and expertise of

the people working on the project.

oExample: "The team will consist of Prof. X, an expert in machine

learning, and Dr. Y, an electrical engineer specializing in power

systems optimization."

1.10 Research/Education Relevance for Career Trajectory

Link to Career Goals: Explain how this research fits into your personal

career aspirations. Highlight how it will improve your expertise and

future opportunities.

oExample: "This project will enhance my career by providing cutting-edge

expertise in both electrical engineering and AI-driven solutions,

positioning me as a leader in smart grid technologies."

1.11 Limitations: Contingency Plans

What limitations exist in your study and how you plan to address them.

This could be data access issues, technological barriers, or budget

constraints.

oExample: "A limitation of the study is the potential lack of data

availability for certain regions. In case this occurs, we will

collaborate with local utilities to gather primary data."

1.12 Expected Outcome

What you hope to achieve: Outline the expected results and the impact

these could have in your field.

oExample: "W

SBIR.STTR

Thank you for submitting your company's Project Pitch to America's Seed Fund powered by the National Science Foundation - the NSF's Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) Program. One of our program directors will review your submission and send you feedback via email within approximately one month.

For you reference, your Project Pitch submission number is **00098889** and was submitted to the **Energy Technologies (EN)** SBIR/STTR topic area. Please be aware that your Project Pitch may be re-assigned and reviewed under a different topic area if determined to be better aligned with that topic.

Please make sure to check your inbox and spam folder frequently. You may also view and revise your submitted Project Pitch at https://nsfiip.force.com/mywork/s/my-pitch-submissions Please note that this link will only be available until your Project Pitch enters the review process.

Please visit our program website for more information about the Project Pitch process, review criteria, current SBIR/STTR Phase I solicitations, and upcoming informational webinars.

Please also note:

- If the proposed project is determined to be a good fit for the program's objectives of supporting innovative technologies that show promise of commercial and/or societal impact and involve a level of technical risk the small business
- If the proposed project is determined to be not responsive to the SBIR/STTR Program solicitation (also referred to as "Objective Not") or fails to
- Projects that are not invited for a full proposal may be resubmitted (with revisions to address any deficiencies) in the next subsequent
- Any small business with a pending Project Pitch must wait for a response before submitting another Project Pitch
- Any small business that has received an invitation to submit a full proposal must wait for a resolution of the full proposal before submitting a new (or revised) Project Pitch.

- A given small business is permitted to submit one Project Pitch per submission window (please refer to submission window dates listed at the beginning of

Should you not receive a response from NSF within approximately one month, please contact us at sbir@nsf.gov

Survey Overview

The National Science Foundation's (NSF) Small Business Innovation Research (SBIR)/Small Business Technology Transfer (STTR) proposal submission process recently changed. We would like to hear from you about this pilot process, which was created to reduce the burden on small businesses and NSF program staff.

The newly added Project Pitch requires a small business to outline the technical innovation, commercialization potential, and broader impact of their project before submitting a full proposal to NSF. Only projects that are determined to be a good fit for the program's objectives of supporting innovative technologies that show promise of commercial and/or societal impact and involve a level of technical risk (mentioned above and outlined on our website: https://seedfund.nsf.gov/) will be invited to submit a full proposal, therefore reducing the time and effort spent by small businesses in order to receive initial feedback on their potential fit with the program requirements. To gauge the effectiveness and clarity of this new process, we would appreciate your feedback.

Please note:

1. Your participation is voluntary.
2. Your individual responses will remain confidential and will be compiled with those from other respondents to improve the NSF's program.
3. Your answers will NOT affect the outcome of any current, pending, or future NSF funding requests.

Top of Form

This section asks about your familiarity with the program as well as your level of experience in applying to the program

Question Title

***** 1-1. Has your small business submitted a full proposal to the NSF SBIR/STTR Program before?

s

1-2. If Yes, how many full proposals has your small business previously submitted to the NSF SBIR/STTR Program?

Dear Tshingombe,

Thank you for your email.

Please note that our office has received 11 emails in 5 calendar days and it is not clear from all emails what is needed.

An official transcript is a full record of your academic activities at the University. It is produced by the Student Records Office only and contains the stamp and the signature of an authorised University official to ensure authenticity of the document. The official transcript is confidential and only issued upon request and authorization of the student using the instructions below:

STEP ONE: DOWNLOAD AND COMPLETE THE ACADEMIC TRANSCRIPT REQUEST FORM

The form can be downloaded from our website: http://www.students.uct.ac.za/students/current-students/student-records/academic-records

Click on *Official Transcripts* and under the *Downloads* section on the right-hand side, the request form can be accessed.

STEP TWO: MAKE THE PAYMENT

The Treasury Office within UCT Finance has taken the precautionary measure to close the cash office until further notice. Please select one payment method to the Student Records Office as follows:

STUDENT RECORDS OFFICE BANKING DETAILS

Bank: Standard Bank

Account Name: University of Cape Town (can be added as a Public Recipient)

Account Number: 071503854 (Current) *If available, select the Sundries Account*

Branch Code: 025009

PLEASE INCLUDE THE REFERENCE NUMBER: 11195/Initials & Surname or UCT student number (e.g., 11195/AB Jones)

1. METHOD ONE: ELECTRONIC FUND TRANSFER (EFT)

Please use the banking details above and send proof of payment to yourself as an emailed notification and download the PDF to your device.

2. METHOD TWO: ONLINE PAYMENT GATEWAY

If you would like to pay via credit card (American Express, MasterCard or Visa only), please click the link for instructions to make an online payment: https://uct.ac.za/sites/default/files/media/documents/SRO_CARD_PAYMENT.pdf

3. METHOD THREE: (FOR INTERNATIONAL CLIENTS ONLY) WIRE TRANSFER

Where payment is being made from outside the rand currency area, payment can be made by telegraphic transfer into the Student Records Office bank account (see details above). The Swift code is SBZA ZAJJ.

STEP THREE: EMAIL THE COMPLETED REQUEST FORM AND PROOF OF PAYMENT

Please attach the request form and confirmation of payment as a PDF document and email it to transcripts@uct.ac.za

Requests will be processed within 4 working days and courier delivery will be made in 2-5 working days thereafter (depending on location).

PLEASE NOTE

1. Once your request has been received and **if you have paid for courier delivery**, our office will send you with a Google form link to confirm the courier delivery details (contact person, contact number a
2. Transcripts requested for delivery to **World Education Services must include a clear scanned copy of your hard copy degree certificate/s and WES form/s** so that we can adhere to WES requirements.
3. The Records Office **does not offer a secure file transfer delivery method**, your transcript can be emailed directly to an institution. Please include the institution's email address and necessary reference
4. Records are not issued to currently registered students until examination results are finalised by the FEC/SEC.
5. Transcripts will not be issued to students or alumni who owe outstanding fees for past or current studies or those with open disciplinary cases against them. Please send our office an email for more in

To speak to a consultant in the Student Records Office, please contact us on +2721 650 3595 should you need any further information or assistance.

Regards,

Nicole Forbes

Records Assistant

To: verificationsletter <verificationsletter@saqa.org.za>

Dear tshingombe

Section 29(a) of the Policy and Criteria for Evaluating Foreign Qualifications within the South African NQF, as amended (March 2017) stipulates the requirements that a foreign awarding institution must meet for its qualifications to be recognised.

SAQA bases the advice below on information currently available to it. SAQA reserves the right to change this advice should new authoritative information come to its attention.

Our online application document stipulates the following in terms of schooling qualifications:

"SAQA accepts only school leaving qualifications issued by the official examining / certification body in the country of origin, and not by the school, where based on external examinations.

No Certificates of Evaluation will be issued for school leaving documents other than those in respect of completed, national school exit qualifications issued by the relevant authorities."

Therefore, only school leaving qualifications correctly awarded by the authorised national examination body in the Democratic Republic of Congo will be recognised and not school leaving documents issued by the school itself.

Please note the purpose of this overseas institutions email is to give people some direction regarding accredited and non-accredited foreign institutions for the purpose of recognition and acceptance by SAQA for foreign qualifications evaluation.

Kind regards

Authentication Services

SAQA

The National Qualifications Framework (NQF) Act 67 of 2008 mandates SAQA to provide a foreign qualifications evaluation and advisory service, which it does in accordance with the Policy and Criteria for Evaluating Foreign Qualifications within the South African NQF, as amended (March 2017). Section 29(a) of the Policy and Criteria stipulates the requirements that a foreign awarding institution must meet for its qualifications to be recognised.

17..Explanation engine calculation

How to calculate bore ,stroke displacement

-volymetric efficiency VE=3456×cfm÷CID× RPM,,

-Cubic inch displacement=NOC=Noc×SV

- head gasket volume: HGV=HGCT×0,785×BORE:

PVD=0,7854×Bore×DPD)+)+(VPD-VPB)= piston deck volume

- compression ratio
CR=1+0,7854×30RE×strokr÷ccv+HGV+PDV.

+ISH=HP/16 : fuel system injector size per horse power..

VE: volume office,

Cfm: engine air flow rate cubic feet per mine.

Cid : engine displacement ,size volume cubic

-RPM= engine speed revolution per minute .

- NOC: number of cylinder

-bore =length

-stroke = length

-HGV= head gasket volume

Hgct : head gasket compressed thickness.

PDV:piston deck volume

DPV: piston distance

Or ..

SV= sweet volume .

CR= compression ration

Ccv: combustion chamber volume

Ish = injector size per horse .

HP: horse power

- 22. explanation: industrial administration management

- explain : general framey historical background complexity of management

- general princy and groi of management thought.

-growth of management the pioneers

- outline of managet theory : definition

- business orgat: organisation the diviy of managet,

-growth of organisations stage growt ,orgabiy chart , organisation rekatu,

- organisation problem : corpsratt planint traditional and modern organit theory future reauit ,

- production marketing and admnistration.

- organisat and the manufacturing fynctt stage in production manufacti,organisation of production the manufacturer functions:

-:Products the ancillat functions b; maintent production planning and control store keeping purchasit handlit of material.

- products the advisory functy : work studye time ,method

-production the advisory functions : work study time study methods work study , ergonomic , operational research inspect.

-marketing : marketing's organisat: admnistration area ,personek management wage.

- growth of industrial relat: trade union unions emply associt collective bargaining and joint negotiation:

- personal managent : motivation of management content of a personal policy achievement of harmony of objectiy:
- the person's department staff recruitment, the manager .
- personnel functionalite organisation if personnel department staff recruitment sciencetif selecti
- job evaluation and : wage structure determining the wage structure merited rating personnel problem induction training wage and salaries:
- personnel problems: disciplinaire promotion safety labour turnover management by participation personnel statistics ., part four financial management and statisciak ..
- financiere management : scope of accounting provist affinaire source of finance.
-outline of financial and cost account definition the purpose account , fundamental accounting transit from financial to cost accrost , classification.
- of cost controlling cost absorbing factor .cost miscellaneous overhead absorpty , overhead facially ..
- cost account system : process casting batch costing hybrids costing ststt organisation for labour orgat for material cost organisat for overhead ..
- method of casting and control : marginal costing decision .
- profit and efficiently and loss measure capital expendy decision .
- statistical method :
Chart and graph statistics quality control .
Designation experimt time Serie published statisic..
- part ,five the industrial environments:

The middlege to eight center the industrial revolution from development of large ..

- principal development in some ,major : coak iron and steel engineering textile chemical and artift fibre ,scienty research..

- the economic ent:.demands and supply cost of production types of compety resale price maintenat the general economic situation.

- general principles of financial and visit low banking and finance trade credibly commerce the merchant bank and issuing house hire finance industi and commercial Indy corporation for industrial negoy instrument.

- government and industry: introt devet of govert organisation of control .

- necessity for government control :

- element of legaj system : the low modern communities source of low common low system Englanders and Wales legal person the idea and property.

- general princiy : of contract princt of contract and commercial law ,contract ,tart liability for dangerous premise agent sale good , miscellaneous commercial low matter,

- elements of industrial low apprenticeship contract of employment factories act Offit premise ,act social insurance industrial arbitration industrial relations general managent division function ..

- explain award bid clause ,price industrial minimum salair ,flow manufacture process lighting tube. Design process:

Order ,item price : product case

24. Explain: pratical school regulation and irregularity

Vocational guidance theory and practice:

-1 vocational guidance ,

-2 explanation: psychological explanation of occupational trait and factor personality development , social learning ,decision making autonomy,

-3 explain sociological explanation of occupational ,choice class gender ethnicity group , opportunity structure an interdisciplinary framework.

4- explain , the interview: philosophy, structure questions talking silence , listening ,non verbal communication information and advice.

- 5 , explain traite factor client centred , psychodynamic, behaviours problem silvt , fantasy,the place of counseling in vocational guidance.

-6 Career Education: explain objective: structure and occupational information the curriculum evaluation.

-7. Test interested questionnaire,self help instrument computer based guide special program

- re written career guidence ,total faculty subject total grad time table Admi total grand reason career

.

-explanation: study of occupational ,self study of occupational.

-qualification obtained your present position how college.

- how to choose career,: knowledge of occupational finding about occupation , know yourself.

-how to apply find employment,way find .

-how to apply for work .

-how work relationship, introduction, different kind ,your concept relationship ..

- communication ,danger

--explain , psychological test : instrument , mechanical and technical aptitude.

-qualification| work do to choose career

- occupation | social conduct , relation social .

Psychometric

-Personality and aptitude profile confitial psychology

-explanation tpm is profitable,direction in production achievement zero breakdown the parko factory.
-RPM challenge limits from four devet stage , definition and distinctive features Tom striving for overall equipment effectiveness tomb,defect prevention system ,between , Tero technology and
-explain: maximizing equipment effectiveness , equipment used at half effective.
- breaks motor stoppages imped automation stop acceleration the deteriore of equipment.
- explain preventive maintenance alone cannot eliminate breakdown five counter measure for zero breakdown.
- unlicensed operational of automated equipment errors equipment investment, five tpm development.
- organising for tpm implementation the twelve step .
- step ,announce top management decisions to introduce tpm ,step 2 : launch Education companies.
Step 3 : establit create organization's promotion.
- established basic Tom police and coak .
- formulate master plan for tpm ..
Tom , implementation,and stabilzat.
Step 6: hold Tom
Step 7: improve equipment effectiveness.
Step 8 : estabt autonomous , maintence prograyfor operational.
-step 8 set up schedule maintenance program for maintenat.
Step conduct improve operation and may skills ,step initial development equipment management.
Small group.

- integration small ,small group goal coincii with goal ,

- evaluating the maturity of small group acty the
functionalite of top many in small group .

25.Total maintenance product,,meeting police ::

-explanation: director social worker practice theory and skill,

- explain social work,an overview.

Direct practice domain phylosophie and roles .

- overview of the helping process.

-explain operationalizing cardinal social work.

- relationship building skill community with emphasis and
authentic.

Verbal following exploring and focusing skill,eliminating
counter productive communict patterd multidimenst
assessment,

- assessing intraperst and environmental system .

- assessing family function , forming and assessing
therapeutic group,enhancing motivation,with involuntary
and ambivat client,negot goal and formulating contract .

- change oriented phase ,planing and implementation
change oriented strategies.

- enhanced client problem solving skills assertiveness.

- modifying envit developing resource and planing ,.additive
emphasis interpolation confrontation ,managing individual
famili and organizat barrier change.

-the termination and evaluation phase ,

Explain : final phase termination and evaluation of code
ethics,timing and intensity ,of self disclosure.

-A paradigm for respond authentic stimulation client message.
-Fuel for authentication response.initiated by practionner.
- positive feedback form of authenticity response .
- relating assertivei to client saying no and setting limit,
- exercise in responding authentication and ,client statement model resnse ,in surface underlying feeling , answer to exercise to discriminate level of emphasize response.
- explain: verbal following exploring and focusing skill , maintaining psychopedagogie contact with clients exploring problem.
Verbal following furthering response ,paraphrasing response,open and closed end , responding,client statement,seeking concreteness ,modeled response , summarise response analizing verak following skil ,
- focussing ,a complex skill selecting topics ,exploring topics depth blending open ended ,empgic response maintained focuy.
- evaluation used of focussing , response ..to exercise,answer to exercise identify in close and ended response ..
-explanation : eliminated counter productive communication patterns: impacts of counter productive communication patterns : eliminating non verbal effecty communicay culture nuance of non verbal ,other inventory of non verbal patter of responding
-communication barrier eliminate verbal to effectively,gauging effective response the challenge of learning new skills.
- multidimensional assessment, critical role of assessment ,

-assessment an ongoing process , assessment as product,include strength in assessing,sources of information verbal report.direct observations of non verbal behavt observations interatclient monitoring collateral source of infot.
- psychologi test ,
-computer assisted personal experience based on direct interat.
- the importance of self awareness.
The multimensionaliry of assessment.
-the problem identify the clarity ecological factory assessing devetneed stress association.
-key factor to be addressed.
Manifestation of the problem, participate
-explanation: source of information verbal report.direct observations of non verbal behaviour, observations interactive.client self monitoring,collateral source of information.
- psychological test., computer assisted asssessor personalite expression based on direct interaction.
- the importance of self awareness.

- the multimensionaliry,of assessment,the problem identify the clarifying , ecological factory assessing development, participants and system implicated in the problem how participate. , development stage and life transitions.
- severity of the problem meaning client to problem.
- site of problematic behaviour the temporary context of problematic.
- frequency of problematic, possible alcohol, substance.
- child maltreatment.and spouse abuse .
- client emotional coping effort skill strength and skill of client .
- cultural and social class factor questions to be answered assessment other factors .
- assessing interpersonal and environmental.
-the interaction of multimensionaliry humans the introper system , biophysical characteristics presentation.
- physical health cult factor in social support , assessing use and abuse of , alcohol and drug , effect of abuse alcohol dual diagnosis in , biophysical social , using interview skill to asses possible , alcohol ,using instrument and procedures assessment .
-assessing abuse ,use of instrument and procedures ,conveying assessment finaling client.genetic factor psychiatry.
-cognitive , perceptual , intellectual judgement , reality testing, cognitive flexible ,value misconceptions, concept, interaction between cognition emotional and behavioural,

- emotional functionalite, emotional controls ,range of emotional, appropriate of affect ,assessing effects disorder ,bipolar effective, bipolarity ,assessing social,.- : motivation: precipating event and motivation,in volunteering client ,culture norm , different, determined pattern degree of acculturation , bicultural and mental health ..
- fluency with language problem solving , achieved credible, providing immediately benefit attitude ward , environment health and safety factor environment resource universal need identify relevant social , system social support system .
- negative social support system assessing reciprocal interactive between individuals , instrument to , environmental need of disabled.
- assessing family function the evolution of family system.
- system framework for assessing .
- family functioning , family home , content process of interaction..
- sequence of interaction employment circulum explanation , assessing problem.
- outer boundary internal boundaries and family subsystem family power structure , family decision making , family and range feeling ,gosk , family myth cognitive communication styles of member ,
- forming and assessing therapeutic group ,classication of group formation of therapeutic,group established group purpose,Agence and practitioners perspective.
- established specifications individual group goal..
- conducting preliminary interview.
- group composition.
-open versus closed group ,size frequently and duration meeting.
- voluntary versus involving ..

-assesin group process, assessing patterned idify group alliance , group norm value ,

-enhacing motivation with involved , applying concept from social, initial contracts structure of initial interview..

- using confrontation facilities.

- negotiation a problem search bargaining with clients getting mandate off your back ..

- exploring self defeat consequences,resolving ambivalence in family creating incentive culture hope , highlights strengths modifying cognitive self .

-negatiatinf goal and formulating an rational contract ,purpose of goal ,type of gosk , guidelines for selecting ,process of mutually selecting ..

,yes head of final switchboard yes),ISC end final), (breaking
capacity,) yes(SST and install trip sitting yes) ,(breaking
capacity yes , St and strip ,(breaking capacity St ms, final .

-explanation: calculation impedance of power source the up
streav network the power supply transformers as well as of
the electrical lines

Problem consider a 20kv network that supplies a HV / LV
substation via 2 m overhead line and MVA generator that
supplies in parallel the busbare of the same substation two
1000kva parallel connected transformers euply the
LV,busbar which in turn supply 29out gears to 20 motor
including the one supplying motor .all motor are rate 50kw
all connections cable are identical and all motor are running
when the fault occurs the isc3a d up value must be
calculated at the variouse fault location indicated in the
network diagram.

-point A on the HV busbars with a negligible impedance.

-point B on the LV busbar,at a distance of meter from the
transformer.

-Point c on the busbar of an LV su distribution board .

-point D at the terminal of motor Mthen the reverse current
of the motor must be calculated at C and B .

up then D ,A

generator , supa ability curves , supplied the manufacture is used to determine the ability of generator to delivery real (Me) and reactive ,(MVar) power to a network determine the capability curve in per unit value of a generator

-characteristic : 989 KVA ,of = 0,85 synchronous reactance ,XD = 1,77 Pu , maximum value of generator internal voltage ,Emax =1,75 p.u terminal voltage ,V= 1.9 Pu ,§= load angle and the system reactance external to generator ,is XE=0,4 .p.u

-calculate stator limited portion stator ,limited is directly proportional ,full power output ,arc ofa circle medium ,Rs=1,9 p.u

- calcul field - limited,P=(3×V.Emax/XD)

Sin§+j(√3.×C.E.max÷Xd.cos§-√3.V.÷XD)

Explanation:-Generation rating for installation:-generation
rating in MVA = turbine rating in MW /power
factor,generator for 600-MW=rating 600Mw
/0,99=677MVA.-o

3.11 Explanation: calculate generator output ,P

Po= √3×KV×IA×pf=(√3)(25)(28.000)(0,975)=1.182,125kw

-calculate generator officiency

Efficiency=power out put)÷+power output+total losses)

=1.182,125÷(1.182,125+10.910=0,99

-calculate synchronisation coefficient at rated load for the
following generator : 75.000kw , terminal voltage
,V=I×o×p×u, armature current,

IA=I×p×u,

Quadrature axes reactance ,X2=1,8 ×pu×

Of=0,80 lagging , neglected the resistive components of
armature

- calculated rated load angles §

The angle §=tan .exp -1.[xq×cos$×Ia÷(Ia×xa×sin$+V)]

Tan .exp-1[1.8)(0,80)(1.0)÷[(1.0)(1,89)(0,6)+1]=35°

-calculate synchronising power coefficient,Pr

Or=(rates kW)÷(rates load angle ×
2π÷360)=(75)(1000)÷(2π÷360)=122,780 kW/rad.

-Generation efficiency:

Determine the efficiency of generator having the same basic characteristics of the generator in the generator regulation additional data including armature full load current ,IA=28.000A ,core and short circuit losses a friction and windage ,loss ,500Kw ,from drive rotor input ,armature , resistance ,Ra=0,0011ohm phase excitation voltage a rates ,470C, excitation current for air gap line 3200A,and output voltage ,25 kV ,compute core loss from and the potier voltage So=1.175 ×p.u, loss 21000kw

-determine short circuit loss for 1.0 Pu line current ,short circuit loss =4700kw

-calculate stray current loss ,stray current ,loss =short - circuit ,loss , armature,loss =4700-862=3838Kw

- calcul power for excitation power for excitation=field voltage ×IfL

=(470)(2,4)(3200)÷1000=3610Kw, IFL

-Determine e total losses :

--friction and windage : 500kw

Core loss. : 2,100kw

Armature copper loss. : 862 kW

Stray current loss. : 3,838kw

Power for excitation. : 3,619kw

Total losses : 10,910kw

-Explain: Generator grounding transformer and resistor.

-determine the size of a transformer and resistor required to adequately provide a high resistance ground system for a Wye, delta start connected generated rated 1009MVA ,26KV ,60GZ,in addition generator capacitance= 1,27 ,if man transformer capacitance =0,12 if ,generator lead capacitance= 0,01uf and auxiliary transformer capacitance = 0,024uf

-calculate generator line -to -neutrak voltage ,VL-N=(26kv)÷√3=15kv

-calculate total capacitance ,CT

CT=to+1,27+0,12+0,01+0,024)if=1,424 uf .

- calculate total capacitve reactance ,Xct

XcT= 1÷2πfcT=1÷(6,28)(60)+1,424×10 exp -6)=1864 ohm

-select ,R= XcT to limit transient over voltage during a line _to_ ground fault assume a 19,92÷0,480Kv

Transformer the resistance reflected to the primary ,is .R'=N.N×R, R' is the requirements resistor ,solve ,R=R'B.N ,,, B= 19,92π0,480=41,5

R=1864÷41,5 exp 2=1,08 ohm

-calculate transformer secondary voltage ,Vs during a line - to - ground fault ,vs = Vs = 1500÷41,5=361V.

- calcul current Is , through grounded resistor ,Is°
Vs÷R=351÷1,08=334,3A

-calcul required continuous rating ,in KVA grounds
transformer rating is KVA ,= I,V, = (334,3)(361)=120,7kva.

- sele

- explain:selected short time rated transformer from ANSI standards ,a50 -kva transformer may be used 9 Min , rating is adequate,

-calculate generator line -to -ground fault current ,If , if = V/XcT =15.000÷1864 =8.05

-Power -factor improvement.

An industrial plant has a 500-hp induction motor load a 4000V, with an average power factor of 0,8 logging ,and a erage motor efficient of 90% ,A new synchronous motor rates at 3000hp is installed to replace on equivenlent load of induction motor the synchronous motor efficient determine the synchronous motor current and power factor for a system current if 80%od the original system and unity power factor

- calculate initial system rating KVA

The rating is KVA=(HP /b)(0,745/of)=(500/0,8)/(0,746/0,8)=518KVA,,n efficiency

- calcul initial system current I o

Io=0,8Ii°(0,7)(746)=597A

-neq induction - motor ,I1

I1=0,746 hob/. √3.n.pf =(0,746)(200)/√3(3)(0,9)(0,8)=299A,

- cal synchronous - motor power factor ,- PFA = 3588/40/1=0,895

-calculate synchronous motor power factor PFA , PFS = 358,8/401,1=0,895

Related calcul verification synchronous rotor horse ,3000hob,,,ho's=3×V×I×n×pf/0,746=

(√3)(4)(401,1)(0,895)/0,746=3000hp

-voltage drop : feeder and branch circuit ,

Vs =IRcos+ix sin , vd = volt drop in circuit line

I=curre flowing in conductor,R= line resistance for one ,angle
whose cousin load power factor ,cos Teta =load ,L=load
reactive power.

L=Load reactive power.

=AWG copper conductor feeding a Motor rated 60hp,(77A
full-load) 3 phase ,460 v , through Regis metal conduit with
a circuit length of 520 feet assume ,that motor power factor
is 85%<

Volt drop =((520feet ×77amps)÷10000)×2,55volt
=102volts.(102Vac÷480volt) ×100=2,13%drop

- motor starting : 20% volt ,level 15%

-short circuit:

Condition load will be served by 1500 KVA transformer ,a 480 ,3 phase a single phase control center the fault current availability from the utilities on source side of transformer is transformed impedance on source side ,of transformer is transformed impedance is assumed to ,5,75% base data , approximately,7,5% of nominal , 5,75%×((100%+7,5%)÷100)=5,32%
-short circuit: condition the load will be served by a 1500kva transformer at 480,3 phase through a single motor control centre the fault current availability from the utilities on the source side of transformer is unknown ,the transformer is approximately,75% of the rating of the transformer note that standard transformer impedance is valued at +1-7,5% of nominal , therefore a conservative calculation the lowest impedance should be used
5,75%((100%-7,5%)÷100=5,32%
-the current flowing during a fault at any point in an electrical system is limited by the impedance of the circuit and equipment from the source or source to the point where the fault has occurred for these simplified calculation we will assume that only source are the transformer and the motor connected to the system the motor are connected in parallel with the transformer as an impedance with an infinite bus as the source of the fault current
- short circuit current= driving voltage /total impedance (ohm,
A point -to- calculation of short circuit current available at any point can using it the basic used per unit calcul short circuit
-value in electric power circuit the reactance of the utility systeme must be assumed zero ,and the following
-approximate transformer per - unit ,Z=(%Z)(base KVA)÷(100)(transfo KVA)
Base KVA = transfo KVA

Per - unit Z,of t transformer=%Z/100

The basic formuler calculating short circuit current when per unit ,

RMS ,sym = base KVA ÷ (1,73×kv×(per - unit Z of the transformer.

KVA = transformer KVA and transform ,KVA ÷ (1,73×kv)load current for three phase transfo ,

ISC ,RMS ,sym= transformer ,FLA÷(%Z÷100)

-Transformers flat = 1500Kva÷(48×1,73)FLA=1,80,

ISC,RMS,y=33,955am

-the rotor construction to fault by single or group of low voltage induction motor can approximately five time the motor full load current this because the reactance of a low,voltage induction motor , including the made as above for a transfo motor load ,75% of transformer rating rating was give ,motor FLA,

1,806×75=1,355Amp, < I,c RMS ,sym = 1,355×5=6775 amp

-total short circuit current available point fault the total of the contribution from the transformer plus , construction for the ,

Total ,I,c RMS , sym = 33,955+6775

4.8 Explain :Lightning: ,2 method ligthning levels in a space the lumen or zonal cavity method and the point by point ,zone cavity method is using calculate the average foot candle level with the space ,point by point method predict illumination for a specific visual task

-design a lighting system for a room 15feet×25feet with a ,11 foot curling that will be used for general office work ,the ceiling will be lay - in - ceiling title and the walls will be ,painted off white the luminaire will be cleaned regulation and lamps will group replaced when the first failure start occure,

_____
- parted getting started in , +5volt ,0 volt ,signal ,volt signal ,DC square wave
To be come electronics decide wath to build create board
Brea circuit jump right in to project
- discovery circuit ,team ling ,
- play with tools to build thing
play w
- if you design a circuit you want building thing make more get soldering pencil ,also called a soldering iron ,the elements of a circuit together choice a soldering pencil.

- you work with project,no doubt other miscellaneous tools pop up that you may ,want you can use ,magnet to retrr screw and other work bench
- tools to measure thing ,
- unitt smiles and bigget .
- current ,OA,nA,mA,uA,A
- inductance ,: Ng,mhuh,h
+5 volt
9 volt with capacitor with caoacit ,
- understand ohm low ,wee wiring a circuit sat know the amount current that the components can with stand blowing up ,how .
V'=I×R.
Taking ohm low father ,I= C/R,,R= V)U,
I= V/E=12/8,= Colts /ohm=1,3 Amo.
-the pou of ohms low ,O= V×i
- can use equation to calcul the power by the buzzer in previous,

O=12volt × 0,095:Amp = 0,962 watt
And you thoug Mrs ,what sir wasted your time in algebra all years , because ,V= i×E,you substit ,I×R,
,you can to rearrange the equat for lower show how ,gadgt sage ,
& Six sens of electronics isn dead people living common sense is that voice inside ,never assumed always double check ,pretend that your soldering bpencik is out get your burn or electrocute your self .
- if your not sure about how to do something read up on it firs , everything in electronics , take chance make ,40/59 something is plugged
& Danger of electrical shock ,electricity = voltage + current
- components shack : stocking up
Our fiting your electronics bent

- take it off wire cutter and stripper name off the wire plastt insulation.
- gettt a grip wit needle - noses pliee ,stripes bend wire and hold pasrus ,place during project assembt for intricat work ,use ,5 - inch needle ,nosed pair of pliers such as jewellery makers usedarger pliers ,such general purpose work ,way the size of the pliers reflection the overall dimensions.
- magniful ,alligator ,nilkon trim cutter wire flush .place for everything and everything in it place .
- filling out the box time to time you workshop tools when construction an electronics project .
- probably need a saw or drill building motorized ghost display ,don't thing you have to rush out an by one evry tools .

- Clow homer ,: used for just about anything you can thing ,.
- rubber mallet : for gently bastinf piece together ,hacrsaw to cur any.
- miter box , to make anled cut with you back saw mete box include ,a 3-4 flat where your place .
Adjustable wrenches ,sometime crescent ,locking pliers ,such a vice grip ,the lockit ,nechanist help hold piece for cuttt sand ,but driver tools ,make it easy it , easy for machine screw ,
Measure tape ,get cheap cloth tape at fabrication store ,
File assortment ,use these file to smoothly the dough.edge of cur wood ,metal and ,plastic.miniature files at the hobby store,.
- drilling motor , working with metal and plastic.

- drill bik fly duty in Tricare work Hans ,operated electronic ,

Drill bit assortment.vixe safer clear

...

[

- explain: transistor, on the case of transistor plastic or metal
, size matter ,

Condensate always observed the polarity marking on
capacitor , changing capacitance .

- diode semiconductor use control flow of electronics semi
conductor a diode had two terminals.

- zener ,ligth , emitting diode silicone controller rectifier.

,- rectifier ,brigth.

- AC, input ,DC out put ,PIV , rating rougth indicate the
maximum working voltage ,diode rated 100volt , current
rating is the maximum amount of current the diode
withstand ,3 Am ,

-diode are identified industry standard numerical ,
systemnclasic is the IN 400 rectifier diode which rated rated
out ,2.0 PIV ,and 50volts A,1N4002 is rated at 100volt ,IN
,4003 rated at 200volt and , which way ,

- resistor , meeting LEDs,

- circuit voltage | current limiting

3.3 to 5 volt. | 330ohms
6to 9volt. | 560ogm
12to 25 volt | 1kohm
-R=(vs-vf)/if..
R: resistance.
Vs: represent supply voltage ,voltage,
VF: drop Led.
If: in Amps
- 7.3explain packing parts together on integrated circuit discret component mean separate Icb.
-linear digital or combination plate lineare ,connection required:
Call pins
number counter clockwise,IC-14pin,IC
Clocking mark : IC pin number counter clockwise , sequence staring from the upper left the clocking notch orientation the child ,at the ,12h 0' posit.

-Filing out your parts pin
- picking the perfect type of wire powering up with batteries and solar cells , flipping switch , controlling output with logic gates , tuning signal with inductor and crystal ,marking Sens of things with sensor , exploring how DC motor working ,making some wmaking connection
Components schact stacking up .

-marking connection : marking a circuit requirements that you connect component to allow electric current to flow between the the following sections describe wire cables and connectors that allows you to do just that

-wire use electronic project long strand of metal or copper ,on job cut open the cord of any old hold lamps make sure ..

Insulation .

-sizs matter wire ,

wire gauge /wire diameter

16. /0,051

30. /0,01

-color.

Making connections with connector typical cable ,call socket or jack ,pins and holes connect the appropriate wire in the cable to corresponding wire in the device.

Cable to the corresponding wire in the device.

- connector run into electronics a terminal and terminal

Block work together type block attachments block to the case chassis project solder crimping a wire to terminal each .

- to connect terminal wire pic a pair of screws and connect.

The terminal each wire tone those screws.early project

-powering up : all wire and connectors have a power source building a project nee Voltage and current thing get power ,from wall outlet we talk about plugging in wall outlet , batteries solder .

-electromechamicsl reaction process turning juice.

- starting you everyday type batteries that ,supermarket
,AAA,AA,C ,D ,size batteries all produce about ,2,5 volt
compare to the transistor battery ,(little , rectangular.

Negative terminal ,,positive terminal,, rechargeable.

- zinc - carbon ,alkaline ,nickel ,-cadmium , Ni cad ,Nicad,

- Nickel - metal hydride (Ni-MH). lithium

Drawn

-turning electricity on and off : switch disconnected wire the
batteries run from the batteries to ligth bulb , connection
wire to allow electric current to flow or disconnect wire

Toggle ,rocker and slide switch ,dobsame job , switch works
well array ,

- hand held flash light because of the position of your.

- thumb ,but a toggle switch may work best to flip on a
gadget sitting on your workbench

- want to see le of switch in action ,#5 described you used
leaf switch , normally closed (NC) ,push - button switch
disconnected ,wire only when you push the button .

- normally open (No) , this push - button switch connect the wire .

- push on push off (button ,this switch connector the wire.

-wath inside a switch ,call basic switch that we talk previous , section single ,pole single ,throw,SPST,,types ,

- single - pole double - throw (SPDT) one wire come in two wire leave , green ligth to let people.

- double ,pole single through (DPST) ,two coming into control two separate circuit , running on 5 volt another ,

-double , pole double ,throw (DPDT)..

LEt a relay flip the switch : simple electrically power .

gadget 5 vol, 117volys power ..

Out put wire , 5,12,or ,24 vdc to power ..

7.5-make decisions with logic gate : play

Comput ,or input invert / input / output

_____

And gate input /output

Input A. Input B. Output

Low

High

- vibration with DC motor

Speaking of sleeker

Building super duper

Buzzer noise get.

-understanding the roles of of schematic getting to know the most Comme ,using and not busing components polarity

-what schema to be care , schematic serve main purpose

Show to reproduce a circuit shown you can build the circuit shown interconnection ,give you overview of of a circuit so that you can better understand how it works, discovery how to read little learn foreign language.

-symbol power ground ,line horizontal , ,117 VAC , outlet DC , battery low ,no ground symbol metal chassis ,,

Make Laball DRA

-connect ,unconnect ,,,jack plugs ,and connector ,
miscellaneous

- basic circuit electronics: series circuit , parallel you can
connect if you,

RT=1÷1/220+1/33+1/10+1/330=7,2ohm ,

I=V/R=9volt/7,2=1,25Am

-voltage dropped across R1=R2/R1+R2×Vt=220÷330×9V=6v.

Bout = Vin -VR2=9volt - 6 volt = 3 volt ,I = ,V/R=2/1=2a.

Team building of basic block of electronics circuit , such as ,
time constant ,= constant = R×C = 2000,ohm × 0,0000015
farad = 30 sec ..

- using transtor is a switch , boosting ,thing with a basic
amplifier .

-An operational amplifier ,IC , op Amol .

Gan = R2/R1.

-R2' is ,10 times ,R 1, the gain is ,10 ,this gain result in a ,2 -
volt input signal producing a ,10-volt out signal .

- An op - amp both negative and positive supply voltage .

Range ,8 to 12 volt negative supply voltage in range ,8 to - 12
work

...

-7.6 integrated circuit: ,

A,555 timer IC wred into a circuit make more of less ,pin
number you used ,connects to pin 8 which ,power and pin
4,which ground connect to pin 1,the output of IC ,St pin

-filing pin 2,and 6,pin 7 , discharge,R2 and R 2,

T1=(R1+R2)×c , T= (R2)×c.

7.8-solder getting industries :

Soldering tools.

Soldering pencil pencil insulating tips iron takes,soldering
pencing ,stand solder ,

- solder hardware,

- wettedspongr ,sipping off excess solder ,

-4×to6×magnifying glass for inspecting your work.

Solder sucker , removing excess ,solder.

-rosin flux remover available in a battle ..

* Third hand ..

- making friend with multimeter.

Basic multimeter ,valt metr (VoM) is the basic tools for test measure AC voltage measurement resistance , measure current going through a circuit measure continuity

Digital analogue,

electronics 12bit.

Discrete step ,step can take any analoi signal circuit , Meyer manufacture select,

Manuel

DC volt ,1000v,AC volt500v ,DC current 200mA, resistance ,2mohn ,

Test output voltage ,, supply voltage ,test switch ,test resistor capacitor ,

Logic probe use ligth to indicate a low or high sign ,logic led indicator,

Testing the frequency of AC ,60 Hz ,50 Hz

2/period = frequently,

2/1,6=0,625 ,see time phototransistor wave for ,span ,, 0,8 a division , 120 flash ,,1/0,80= 125..

- Pletorate : project couple of circuit board constructy point - to - point wiring , wrapping ,

Taking a look at soldering ,bread band ,styless,

- title silver,metal connect , resistor , capacitor,transistor,IC

Bread board consider of columns that connect electrical

- Pre , stripper wires.

Building your own printed circuit board .

- printed circuit board is mode of copper and on insulating

- finished PCB , use pools for soldering on components and traces in place of wiring .

-manufacture make circuit board .

- first the coal the copper with a ligth , sensitive chemical layer called the sensitizer know a resistor ,Photo resistor

-;next the place exact ,size film negat of t circuit board layout drawings over copper clad expose ,expose ,processing board in ligtg in case strong ultraviolet light..

-after exposing the board the dip it in resistance development this messy stuff but a necesst , development copper turned black or a dark Gray positive .

_as final step they dip the board in etchant ,

- step build choosing right copper clad material that you to make ,printed circuit cladding square ,35 micro metre ,cutting and cleaning board use make PCB ,

-created PcB , photographic.

Prepared a mask of circuitayout and transfer it on clear
transparent film variety of methods as description section.

- use mask to expose a sheet of sentived strong .

- dip the sensitizer,exposed sheet into a development.

- submerged the copper sheet,tray of .

Flip flop create

-ligthing effect projector...

- cool robot project to amaze :

Rover robot list ,

Bottom deck ,cut to size ,top deck,cut to size ,2 Tanya ,worm
gear motor (model ,#72004)

- 2.tamya narrow wheel sets (model # 70144)

1.1/4 inch swivel casters ,26-32 by ,1/2 inch machine screw
,26-36 nuts for caster ,4 risers , constructed with stand , 6-32
machine screw , 2 DPDTcentre ,

- 4 - cell ,AA batteries ,smaller wooden or plastic,board (for
mounting the switch a battery ,20 to 25 feet of flexibility
lamp ,also call ,zip ,solder electrical tape..

-make draw LED flash circuit,detector infrarect,police siren
,alarm schematic,,amp

Ic1: LM 555 timer ,IC ,

Q1:2N3906,PnP transistor

R1: 100k potentiometer

R2:,3,9 Kohn resistor

R3:20,ohm resistor

R4:47,Kohn resistor

[

-7.9.explain: .the bits and pieces of a bit .you don't have to make your robot body elaborate to make it Google body elaborate make a simple and shirdy body by using common tools and readily available material simple can building square shaped body more easily .

-introducing rover the robot .

-fairly simple robot that gives perfect intro to robot building
just staring .

,- in the basic rover ,use two small DC gear motor to control
it's movement ,by using a pair motor to control it's
movement ,by using a pair of wired switches gear motor
motor are like regular motor , except they also of gears that
make the motor more ,propelling the switch down up and
down its lot more fun that if sound especially if have car dog
to chose around don't worry no animal will be harmed
during this project .

- the advance rover use a microcontroller , specifically e
basic stamp 2,to building self contained autonomous robot ,
with verst your program the microcontroller for what you
won't rover to do this smart rover uses specialised motor
that you have to take operate and and modify you ,

,-;preparing to building the bot .

Befot you can drill your first Hade or fasten your first but
,you need to layout design of your robot ,acquire LL the
material and sort.

-first get your self a template.

Although you use a circuit schematic for simple projects ,you
graduate to something called ,a cutting and drilling template
for making a robot this template as the layout for your
robot draw the layout scale ,that the size and shape that
you want the finished piece to ,-be-on a piece of paper.

- the cuttt and drilling template for river two - deck tablet
robot the dimensions used .in this template are measure.

Inch the template include the two body piece we call decks
,like the decks of a ship ,there s a bottom deck and top deck
,you attach ,the motor wheel to the bottom decks ,top deck
is left free for future enhancement such an add ..

Draw ,

Gathering your material rudimentary construction skill to build rover using .

- 1/4inch hardwood plywood ,a good choice ,is 5-ply our craft plywood available at any hobby store

-1/4 inch rigid plastic you can this plastic Stores.

- if you re nor careful , acrylic can shaftle when you re drilling or cutting IL.

- acrylic drill tools Mather quickly

-acrylix generate a ton of static electricity.

-gating piece : machine screws size.

When using stand off as rises the minimum length that you can use ,2/2 inch ,1-or,1.1/2 inch standoff work.

- if you re using machine screw distance between deck piece plus thickness of the deck piece , material thickness of the retaining nut ,want inch. Of clearance and you 're using 2/4inch thick wook ,or PVC ,the machine screws must .

- building the body of the bot plan material in hand actually start construction,so put on you your hard ,and ,oh don't forget .

- cutting and drilling the piece of robot body first step building process is to use the robot layout from , fig ,,15-1to drill holes for mounting parts and the cut the deck piece .

- layout the holes and cutting dimension from the template ,15-1 directly wood or plastic material on better yet draw the m first on a piece of papper the tape paper over the wood or plastic material.

-when all look right ,drill holes for rover using a 2/8,inch drill bik , not drill Manuel,drill press Helt accurate holes.

-after you finish drilling cut the piece to size used hacsiw ,coping saw jigsaw ,band saw it prove control

-sand Draw the cornea of the piece to produce bevels edge more sharp angle at each corner cut rover .

- Assembling and mounting the motor set a side the body piece for now and turn to assembling the two gear motor you put these motor together by following the instructions your motor Phillips screw drivers to assemble the motor note that the screw driver does come in the kit si you need to buy one if you don't already have need small hex key wrench ,attach motor ..

- a Tamiya gear motor.

- asssmbled and ready to go .

- the motor attach to the bottom deck of rover by using small screw.

- doing a shells : with motor attached its times to secure the wheel in place putting the shell for little robot buddly ,involve step mounting on axle to gear motor and attaching the wheels to that axel .

-2axle in the gear motor kit , build your robot ,

Model number 70145 ,two 57 millimetres diameter rubber tire about ,2.1/2 incht

- attach the two motor ,the robot using ,4-40 by ,2/2 inch machine screw and ,4-40nuts ,15-6

- mounting the caster : swivel casters support base robot located opposite the gear motor standard, 1.1/4 inch located opposite the gear motor standard.

1.1/4 inch ball - bearing caster :

A you attach caster by usit ,6-32 by ,1/2 inch machine screw and need the drilling holes in the layout and spacing depending on the model of castle .

- adding the second deck.

- t fireshed but not . ,smart rover with wheel and a second b.

- control switch gone through preceding section completed your rover assembly firing .

- diagram shows you how to hook up a battery to two double pole double throw ,toggle switches this diagram wire the switches so that flipping a switch forward power motor one way flipping.

- following the step to hook up the battery I .

- 1 solder a 8 to 10 foot length of lamp card wire from the center terminal of each switch to left and right motor of the rover .

-2 solder the leads from 4,cell AA ,battery holder the red wire and the black wire from battery ,to the terminals on both switch .

- connect to battery to control switch then connect the switch to motor..

- solder the remaining grimper between the switch terminal as ..

-the jumpers from an x shop ,when you wire in this way ,the switch revers polarity of the voltage from the battery as you toggle them.

-;drill two ,3/8" ,(or so) hole in piece of 4'×4"×✓,1/4" plastic or whole allowed place underneath ,size of hole depend on the mountinf requirements of switch using should be just large .

-use the retaining that come with switches to secure the switches to the plastic or wood.

- place the switches in their center /odd position .

- put for AA, batteries in the batteries holder .

- use tape (electrical tape or duct tape works bet to security battery holder to the piece of plastic or wood.

- tuck ,some of the wire leading from the switch to the robot inside the tape acting , switch backwards bto reverse direction.

-driving miss rover .

- make your robot turn buy pushing one switch forward.

Steer by direction ..forward,reverse,right turn ,left turn ,hand right turn ,hand left ,

- DC motor out ,R,/C servo motor in .

A typical standard size ,R/C servo motor

- shoppt for servi . Manufacture of R/c servo motor inf servo motor for robot.

- Futaba ,S148,ground wiring servo (GW's) S03, and ,S05,gitec ,HS - 422.

- making servo serviceable , manufacture ,90° , modified on R/c servo .

- sensing thing with a bumper switch piano ..

- many leaf switch are SPDT,they have ,3 terminal common , normally open (no) normally closed (NC) terminal work well ,no normally.

- putting a switch on the front of your robot .

Connecting up to the board of education

You almost have working smart youe now ready to connect the servo ,Wich mount on the rover as described in the section mounting servo ,earlier basic stamp board of education you can check out the overall connection..

- steobdigrame of servi connection to be,

Servi black and ,basic stamp board Education yes .

- you use I,/O part ,12 communicate between to BoE ,servi ,part 13,is located on line 17 and ,part ,14 is located pin ,19 basic stamp 2,chip ,note pin number for .

4 corner pins are indicated ,basic stamp ,I/On..

- making switch and power connector sensing thing bumper car switch servo than ,9 v batteries,4AA

-

The purpose of this foreign institution's enquiry service is to give some direction regarding accredited and non-accredited foreign institutions.

Please go to the following link: https://www.dhet.gov.za or access SAQA's searchable website database, the link is https://regqs.saqa.org.za/search.php?cat=qual for information pertaining to the accreditation
status of South African institutions and their qualifications.

Kind regards

Authentication Services

SAQA

The National Qualifications Framework (NQF) Act 67 of 2008 mandates SAQA to provide a foreign qualifications evaluation and advisory service, which it does in accordance with the Policy and Criteria for Evaluating Foreign Qualifications within the South African NQF, as amended (March 2017). Section 29(a) of the Policy and Criteria stipulates the requirements that a foreign awarding institution must meet for its qualifications to be recognised.

to me

Dear Tshingombe Fiston,

We are pleased to inform you that your reported Incident has been resolved.

Reference No.: INC000025277051

Summary: Request assistance from Dept of Higher Education and Training

Your reported Incident has been resolved with the following resolution:

The N3 statement of results for 2100002023812 for the 2023/11 exam was released and sent to SHALOM TECHNICAL COLLEGE on 01/02/2024 waybill number 080057034873 (SkyNet couriers). Candidate does not qualify for a certificate as he did not pass all subjects. For a diploma to be awarded (as per the complaint), a candidate must achieve N4, N5 and N6 certificates and also have the relevant experiential work, then submit the application at the college. This candidate does not qualify for that. Complainant was responded to via an email.

Please do not hesitate to contact the Service Desk should there be any further questions or inquiries regarding your Incident. Please quote your assigned Reference Number.

Yours sincerely,

Service Desk

eady to light up your career?

- Ready to light up your career? Whether you are an artisan or engineer; graduate or experienced professional or tradesperson, we look to attract people who will add value to our business.

- We may not always have vacancies open, but when we do, you'll find the information below.

- If you meet all the requirements outlined in the job profile and can provide all the relevant documentation to support your application, then we invite you to apply.

External candidates should:

- Step 1: Download the application form (Download the Application Form).

- Application Form

City Power Application Form for Employment.pdf

- Step 2: Complete the application form

- Step 3: Attach all the required documentation

- Step 4: Submit application to the email address provided and wait for feedback.

- You will receive a call or SMS from City Power if your application has been successful. This may take up to 3 – 4 weeks.

Vacancies

Looking for a career opportunity in City Power! Well, the opportunity within is just a click away. Candidates can now search and apply for jobs online – at any time, from anywhere. Whether you are a school leaver, professional or tradesperson, we could have a position to suit you. City Power aims to be an employer of choice by attracting highly-skilled people who will add value to the organisation.

Here you will see what your estimated electricity cost and usage is, and energy savings tips to help you bring your costs

Your electricity cost this month

R304.00

Your power usage this month

116.00kWh

Power usage by category

Total consumption

Kitchen 27.65kWh

Outside 0.03kWh

Bathroom 86.88kWh

Bedroom 1.83kWh

Power usage by appliance type

Total consumption

Savings tips

lighting

1. Replace all your CFLs (Compact Fluorescent Lamps) with energy saving LEDs (Light Emitting Diodes) - switch off lights in all unoccupied rooms.

2. Install day-night sensors on outdoor security lights.

3. Ensure that your oven door is closed until the food is done - opening and closing it wastes energy.

Thank you for using this service. Note: AF IMPORTED ITEMS MAY TAKE LONGER TO SUPPLY

1. If you are placing an order - it has now been entered into the order queue, and will be processed by the next available Agent.

2. If you are requesting a Quote - this RFQ has been sent to the Quotations queue.

As a reminder - please ONLY use this address for new orders : za-ccc@schneider-electric.com with no copy (CC).

And for quotations send to : za-quotes@schneider-electric.com
You will receive answers based on information in the Schneider Electric Price List.

Should you wish to have a copy of the Price List so that you may complete your own Quotes, request this and we will forward you a copy.

* * * * * Please do not resend as this may result in duplication.* * * * *

Note 1: On all transactions Schneider Electrics terms and conditions apply.

Note 2: Also all text and instructions should as far as possible be printed on your order, together with your Company letter head, updated telephone, contact and address details.

Kind Regards,

Dear tshingombe,

Please find your configuration created from:

Configuration link: My Configuration

Your configuration ID: **2990198c-6d29-4dcd-98e9-b41d44239222**

Motor Starter parameters selected

Technology: Variable Speed Drive

Supply Voltage: 240 V

Motor Power: 2,2 kW

Segment and Process: Machine Manufacturing

Application: Standard machines

Heavy Duty selection: no

Breaker

SCCR: 30 kA

Contactor

Coil voltage: 230 V AC - 50/60 Hz

Coil Type: Standard

Drive

Bill of Material

Devices	Options	Description
Breaker		
GV2ME32		Motor circuit breaker, TeSys Deca, 3P, 24 to 32A, thermal magnetic, screw clamp terminals, button control
Contactor		

LC1D25P7		Contactor, TeSys Deca, 3P(3NO), AC-3/AC-3e, <=440V, 25A, 230V AC 50/60Hz coil, screw clamp terminals
Drive		
ATV12HU22M2		variable speed drive, Altivar 12, 2.2kW, 3hp, 200 to 240V, 1 phase, with heat sink
